# ORDERING INFORMATION & TERMS

Dear Model Railroader,

Happy New Year & Welcome to the Winter 2020 Atlas ASMC Consumer edition of product Announcements and Arrivals. This All Scales Monthly Catalog (ASMC) is the core of our guaranteed pre-order system. Prior to the start of supplier production, Atlas announces to authorized dealers, distributors and e-subscribers that we are ready to take orders. This notification comes in the form of Atlas' All Scales Monthly Catalog (ASMC) which focuses in on the current month's planned and specified announcements and allows consumers to place guaranteed pre-orders with their local hobby shop for those specific products by a given date. If you need assistance finding a dealer near you, don't forget our Hobby Store Locator! Check out the locator at <http://shop.atlasrr.com/storeLocator.aspx>. You can also view and reserve products via Atlas' online store [shop.atlasrr.com](http://shop.atlasrr.com).

This edition of the ASMC is sure to help shake those winter blues! In both HO & N scale, we're featuring a new run of ALP-45DP Locomotives, Cab Cars and Trailers. This run of Modern Commuter Trains features the standard NJ TRANSIT scheme, as well as NJ TRANSIT's recently unveiled Heritage Schemes, including Erie Lackawanna, Jersey Central, Conrail and Pennsylvania Reading Seashore Lines. We're announcing a brand new locomotive in N scale – the GP40-2W Locomotives, along with 41' Ballast Hoppers. HO will also see the announcement of the new U28C and U28CG Locos, as well as new paint schemes and new road numbers on the Single and Paired Window Coaches, 89' Flat Cars and Plug Door Box Cars. O scale rounds out the winter's offerings with 8,000 Gallon Tank Cars, Cupola Cabooses and Containers - you'll find all of those wonderful models and more inside, as well as arriving locomotives, rolling stock and track in all scales.

We hope that you enjoy the product selections on the pages within, and as always, thank you for your continued support of Atlas!

Happy Modeling,

Joe Kolnoski  
Vice President of Sales

## NEW MODEL!

Huron Central\*

#### PROTOTYPE INFORMATION:

In 1973 Canadian National (CN) designed the safety cab, also known as the comfort cab, which featured a full-width nose that was intended to improve crew safety in the event of a collision. The first CN locomotives to feature this cab were GMDD GP38-2s and MLW M420s. GO Transit ordered the first safety cab equipped GP40-2s in 1973 with a three-unit order. CN then ordered their first safety cab GP40-2s from GMDD in 1974. Using CN's locomotive classification system, these locomotives were assigned the designation GF-430 (General Motors, Freight, 4-axle, 3000hp). Letters are added after this designation to denote the separate orders for a given model.

The terminology "early" and "late" is used when referring to various road names on this run. "Late" CN and former CN units feature ditch lights, snow shields and have their air horn relocated to the top of the long hood.

 **Gold Models  
with ESU Sound**

#### MASTER MODEL FEATURES:

- Long Hood Styles: CN (single light w/o number boards)
- 3,000 Gallon Fuel Tank
- Will have properly operating ditch lights
- Snow Shields
- Round or Square Sand Fill Hatches
- Cab-Mounted Bell
- Three-Chime Air Horn Mounted on Cab or Long Hood
- Etched Metal Sunshades (user installed)
- Factory-installed AccuMate® magnetic knuckle couplers
- Blackened metal wheels
- Scale Speed™ motor
- Atlas Master® Gold version features ESU LokSound Decoder
- Silver Series includes factory installed speaker for easy upgrade to sound

#### Silver Sound Ready™

Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder. If you need assistance with the upgrade of a Sound Ready model, please contact Atlas Customer Service at 908-687-0880 or [csdept@atlasrr.com](mailto:csdept@atlasrr.com)

#### PROTOTYPE INFORMATION:

The ALP-45DP is a "dual mode" locomotive, capable of drawing power from either overhead electrical wires or its own pair of 12-cylinder Caterpillar diesel engines. These flexible locomotives were designed to provide a one-seat commute from NJ TRANSIT's various diesel-only lines into the electrified territory that leads to New York City's Penn Station. This fulfills the requirement of not operating diesels through the North River Tunnels and within the subterranean Penn Station complex. Produced by Bombardier Transportation in Kassel, Germany, the first ALP-45DP locomotive entered service on NJ TRANSIT on May 30, 2012.

NJ TRANSIT's 35 ALP-45DP locomotives are commonly seen on commuter trains traversing the Morristown Line, Montclair-Boonton Line, Raritan Valley Line and North Jersey Coast Line. These lines do not have overhead electrical wires for their entire length, necessitating a change of power source somewhere en-route. Previously, locomotives or entire trainsets would have to be changed, inconveniencing riders. The ALP-45DP alleviates this need, performing the switch from diesel to electric power (or vice versa) in just under two minutes during a routine station stop.

**PRICES ARE SUBJECT TO A POTENTIAL PRICE INCREASE PENDING FUTURE TARIFF IMPLEMENTATION.**

## NJ TRANSIT HERITAGE EQUIPMENT

To help celebrate their 40th anniversary, NJ TRANSIT placed banners and wraps on select cars and locomotives of railroads that previously operated over their routes. Some of these included, Conrail, Central Railroad of New Jersey, Erie Lackawanna, Pennsylvania Railroad and the Pennsylvania-Reading Seashore Lines. Each of these railroads had a specially made rectangular banner containing the wordmark and logo, placed on a Multilevel passenger car. These cars were then placed in a set and operated like this for a few weeks, creating a colorful reminder of the past. The heritage celebration did not stop there, however as NJ TRANSIT then took ALP-45DP number 4519 and wrapped the front and sides in an Erie Lackawanna E-8 inspired scheme. The sides had the correct gray, maroon and yellow bands along with the standard E and F unit front complete with EL Diamond on the nose. This sharp looking dual-mode locomotive was released with a few other heritage locomotives during NJ TRANSIT's "MMC Family" events. As of mid-January 2020, the EL heritage ALP-45DP was in PTC test-train service, plying the rails of the Morris & Essex, Gladstone, Montclair-Boonton and the Bergen County and Main Lines, of which its heritage it represents.

NJ TRANSIT "Pennsylvania Heritage"

NJ TRANSIT

### PROTOTYPE INFORMATION:

Concurrent with its purchase of ALP-45DP locomotives, NJ TRANSIT also purchased 62 multi-level cab cars from Bombardier Transportation. These cab cars are used on the opposite end of the train from the ALP-45DP locomotive to facilitate "push-pull" operations, where the engineer in the cab car can control the locomotive pushing from the other end of the train. A cab car provides an engineer with all of the same controls as a locomotive cab, allowing the train to reverse direction without turning around. Cab cars also include all standard locomotive safety features, such as a horn and bell.

The multi-levels' fixed 2-2 seating arrangement provides ample legroom and maximizes passenger comfort while increasing capacity. All of NJ TRANSIT's cab cars also include toilets. NJ TRANSIT's multi-level cab cars have a capacity of 127 commuters (approximately 17% more than its single-level counterpart, the Comet V). These cars routinely operate over most routes on both the Hoboken and Newark Divisions of NJ TRANSIT, carrying over 300,000 commuters daily to and from destinations all over New Jersey and into New York's busy Penn Station.

### MULTI-LEVEL CAB CAR MODEL FEATURES:

- Designed from prototype drawings and field research with the cooperation of NJ TRANSIT
- Illuminated directional LED headlight/ditchlights and red marker lights
- Separately applied air horn, antenna, lift lugs, end barriers and rubber diaphragms
- Free-rolling metal wheels
- Interior includes seat details and LED illumination

#### PROTOTYPE INFORMATION:

In addition to its multi-level cab cars, NJ TRANSIT operates an additional 367 multi-level trailer coaches without cabs. Ninety-nine of these cars include a toilet and have a passenger seating capacity of 132 commuters. The remaining 268 trailer cars do not have a toilet, and feature seating for 142 passengers. The multi-level trailer cars are always operated in matching sets (with a multi-level cab car on one end and a locomotive on the other), and these cars carry commuters over 2.2 billion miles every year.

#### MULTI-LEVEL TRAILER CAR MODEL FEATURES:

- Designed from prototype drawings and field research with the cooperation of NJ TRANSIT
- Interior includes seat details and LED illumination
- Separately applied lift lugs, end barriers, and rubber diaphragms
- Free-rolling metal wheels

#### PROTOTYPE INFORMATION:

For railroads, the maintenance of their tracks and right of way is a pivotal part to their success and safety. In order to keep a well-balanced and smooth roadbed means a good portion of ballast must be laid down and reapplied when necessary. Usually a string of ballast hoppers are called in for this job. Unlike a regular open top hopper car, ballast hoppers have specialized gates at the bottom of the bed that allows the ballast to be spread to the sides of the rail. Most railroads had their own fleet for this matter, but also will lease from companies such as Herzog, which owns a large fleet of ballast hoppers. The Atlas 41' Ballast Hopper will help your railroad accomplish necessary track work.

#### PROTOTYPE INFORMATION:

Introduced by Pullman in the mid-1960s, the PS-4427 low side covered hopper became the backbone car for many of the large grain hauling railroads as well as the car of choice for many leasing companies. The 4427 also was used to haul malt and sand products, which increased their venerability. Many of these hoppers wore colorful, diverse schemes, which featured large logos or lettering. Some of these cars still exist in service today.

#### MASTER MODEL FEATURES:

- Gate tracks on chute
- Upgraded brake wheel
- Sturdy body
- Detailed brake wheel and air reservoir
- Crisp lettering
- Accurate paint schemes
- Knuckle couplers

#### PROTOTYPE INFORMATION:

Built for Trailer Train by ACF between 1966-68, the visually unique "F89-J" 89' Flat Cars were produced for TOFC service and was the only standard-height, bowl deck car of this design by ACF. Easily identified as a common asset in the vast TTX car fleet, over 1,600 F89-J's haul trailers, pipe, rail, bulk loads, and hundreds remain in service today! Not easily confused with any other 89' flat car, these models will add flair to your freight roster!

#### MASTER MODEL FEATURES:

- Ready-to-run
- Die-cast metal frame
- Fine-scale detail
- Accurately painted/printed (multiple variations!)
- Collapsed & raised hitch detail
- Prototypical ride height
- 70-Ton trucks
- Fine-scale metal wheels

#### PROTOTYPE INFORMATION:

The Ford® Explorer is a mid-size sport utility vehicle sold in North America since 1990, essentially making the SUV, a special-interest vehicle at the time, one of the most popular vehicle types in the market today.

First generation Ford® Explorers (1991-1994) were equipped with a 4.0 L 155 hp V6 engine and 4-speed A4LD automatic transmission or 5-speed M50D manual transmission. 15 hp was added for the 1993 edition for a total of 170 hp. Much like its predecessor, the Bronco II, the Ford® Explorer was derivative of the Ford® Ranger Pickup, but larger. It came in both 2-door and 4-door bodystyles and was available with rear or four-wheel drive. Explorers came in 4 trim levels: base XL, XLT, Sport (only available on the two-door version), and the upscale Eddie Bauer Edition. The Limited edition, added for 1993, was available only in the 4-door style and was even more upscale than the Eddie Bauer version.

Coming in a range of prototypical colors, these vehicles will look right at home parked in front of our garage kits, out on the streets of your layout, or, for layouts based in late 1992 and on.

#### VEHICLE MODEL FEATURES:

- Simulated rotary beacon
- Side view mirrors
- Head and tail light glazing
- Interior detail
- Simulated rubber tires
- Under carriage detail

**NEW  
MODEL!**

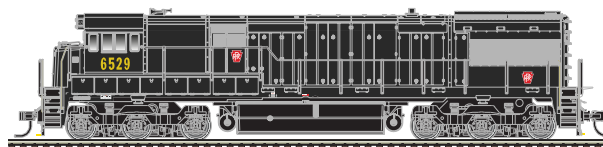

## U28C - NEW MODEL!

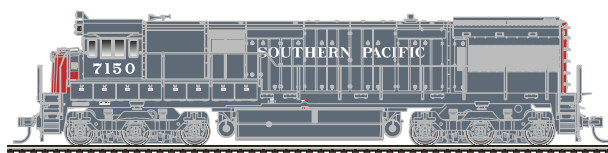

Louisville & Nashville\*

Conrail

Pennsylvania

Southern Pacific

Union Pacific

### PROTOTYPE INFORMATION:

The General Electric U28C locomotive, developed in 1966, provided a 300 horsepower increase over its predecessor, the U25C. Built on a larger frame than the U25C, the model also incorporated other improvements, such as new floating bolster trucks. A passenger-hauling variant, the U28CG, was produced for the Atchison, Topeka and Santa Fe Railway. These units were painted in the timeless red and silver Warbonnet paint scheme and put into service on the Texas Chief, replacing well aged F units. Upon being retired from passenger service the U28CGs were repainted into the standard Santa Fe freight colors of blue and yellow.

Early U30Cs were based on the U28C design and were visually identical to the Phase II U28C, of which this new model from Atlas represents.

Southern Pacific model features SP style lighting including nose mounted headlight, cab mounted Gyalight, and roof mounted Emergency light.

#### PROTOTYPE INFORMATION:

The ALP-45DP is a "dual mode" locomotive, capable of drawing power from either overhead electrical wires or its own pair of 12-cylinder Caterpillar diesel engines. These flexible locomotives were designed to provide a one-seat commute from NJ TRANSIT's various diesel-only lines into the electrified territory that leads to New York City's Penn Station. This fulfills the requirement of not operating diesels through the North River Tunnels and within the subterranean Penn Station complex. Produced by Bombardier Transportation in Kassel, Germany, the first ALP-45DP locomotive entered service on NJ TRANSIT on May 30, 2012.

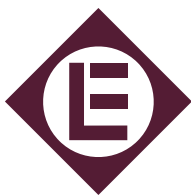

NJ TRANSIT's 35 ALP-45DP locomotives are commonly seen on commuter trains traversing the Morristown Line, Montclair-Boonton Line, Raritan Valley Line and North Jersey Coast Line. These lines do not have overhead electrical wires for their entire length, necessitating a change of power source somewhere en-route. Previously, locomotives or entire trainsets would have to be changed, inconveniencing riders. The ALP-45DP alleviates this need, performing the switch from diesel to electric power (or vice versa) in just under two minutes during a routine station stop.

SCALE

## NJ TRANSIT HERITAGE EQUIPMENT

To help celebrate their 40th anniversary, NJ TRANSIT placed banners and wraps on select cars and locomotives of railroads that previously operated over their routes. Some of these included, Conrail, Central Railroad of New Jersey, Erie Lackawanna, Pennsylvania Railroad and the Pennsylvania-Reading Seashore Lines. Each of these railroads had a specially made rectangular banner containing the wordmark and logo, placed on a Multilevel passenger car. These cars were then placed in a set and operated like this for a few weeks, creating a colorful reminder of the past. The heritage celebration did not stop there, however as NJ TRANSIT then took ALP-45DP number 4519 and wrapped the front and sides in an Erie Lackawanna E-8 inspired scheme. The sides had the correct gray, maroon and yellow bands along with the standard E and F unit front complete with EL Diamond on the nose. This sharp looking dual-mode locomotive was released with a few other heritage locomotives during NJ TRANSIT's "MMC Family" events. As of mid-January 2020, the EL heritage ALP-45DP was in PTC test-train service, plying the rails of the Morris & Essex, Gladstone, Montclair-Boonton and the Bergen County and Main Lines, of which its heritage it represents.

NJ TRANSIT

#### PROTOTYPE INFORMATION:

Concurrent with its purchase of ALP-45DP locomotives, NJ TRANSIT also purchased 62 multi-level cab cars from Bombardier Transportation. These cab cars are used on the opposite end of the train from the ALP-45DP locomotive to facilitate "push-pull" operations, where the engineer in the cab car can control the locomotive pushing from the other end of the train. A cab car provides an engineer with all of the same controls as a locomotive cab, allowing the train to reverse direction without turning around. Cab cars also include all standard locomotive safety features, such as a horn and bell.

The multi-levels' fixed 2-2 seating arrangement provides ample legroom and maximizes passenger comfort while increasing capacity. All of NJ TRANSIT's cab cars also include toilets. NJ TRANSIT's multi-level cab cars have a capacity of 127 commuters (approximately 17% more than its single-level counterpart, the Comet V). These cars routinely operate over most routes on both the Hoboken and Newark Divisions of NJ TRANSIT, carrying over 300,000 commuters daily to and from destinations all over New Jersey and into New York's busy Penn Station.

#### MULTI-LEVEL CAB CAR MODEL FEATURES:

- Designed from prototype drawings and field research with the cooperation of NJ TRANSIT
- Illuminated directional LED headlight/ditchlights and red marker lights
- Separately applied air horn, antenna, lift lugs, end barriers and rubber diaphragms
- Free-rolling metal wheels
- Interior includes seat details and LED illumination

### PROTOTYPE INFORMATION:

In addition to its multi-level cab cars, NJ TRANSIT operates an additional 367 multi-level trailer coaches without cabs. Ninety-nine of these cars include a toilet and have a passenger seating capacity of 132 commuters. The remaining 268 trailer cars do not have a toilet, and feature seating for 142 passengers. The multi-level trailer cars are always operated in matching sets (with a multi-level cab car on one end and a locomotive on the other), and these cars carry commuters over 2.2 billion miles every year.

### MULTI-LEVEL TRAILER CAR MODEL FEATURES:

- Designed from prototype drawings and field research with the cooperation of NJ TRANSIT
- Interior includes seat details and LED illumination
- Separately applied lift lugs, end barriers, and rubber diaphragms

#### PROTOTYPE INFORMATION:

Coaches formed the backbone of the American passenger car fleet. These cars were used on long and short haul trains, through trains and commuter runs alike.

The prototype for our single window model was built by Pullman, ACF, Standard Steel and others for the New York Central System. Cars of similar designs were built for many other railroads from coast to coast, and they served many years in a wide variety of services.

#### MASTER MODEL FEATURES:

- Full interior detailing
- Scale operating diaphragms
- Full, separately-applied underbody detail (brake piping, steam traps, brake rigging, etc.)
- Scale window glass
- Detailed trucks with free-rolling metal wheels
- Recommend 24" Radius Minimum

### PROTOTYPE INFORMATION:

Built for Trailer Train by ACF between 1966-68, the visually unique "F89-J" 89' Flat Cars were produced for TOFC service and was the only standard-height, bowl deck car of this design by ACF. Easily identified as a common asset in the vast TTX car fleet, over 1,600 F89-J's haul trailers, pipe, rail, bulk loads, and hundreds remain in service today! Not easily confused with any other 89' flat car, these models will add flair to your freight roster!

### MASTER MODEL FEATURES:

- Ready-to-run
- Die-cast metal frame
- Fine-scale detail
- Accurately painted/printed (multiple variations!)
- Collapsed & raised hitch detail
- Prototypical ride height
- Era-specific cut levers
- 70-Ton trucks
- Fine-scale metal wheels

#### PROTOTYPE INFORMATION:

This Atlas HO Trainman® model is based upon the typical RBL class of insulated box cars that were used to carry canned goods that required protection from extremes of temperature, but not refrigeration. These cars had neither ice bunkers nor cooling units.

Plug-style doors were normally used to ensure a tight seal in the insulation. Designed for transport of both perishables and large loads, plug doors allowed box cars to be sealed from outside dust and dirt. These units are painstakingly designed to provide many hours of optimum, smooth performance and hours of modeling enjoyment.

#### TRAINMAN MODEL FEATURES:

- Prototypical painting and lettering
- Roller-bearing or friction-bearing trucks where appropriate

#### PROTOTYPE INFORMATION:

The Ford® Explorer is a mid-size sport utility vehicle sold in North America since 1990, essentially making the SUV, a special-interest vehicle at the time, one of the most popular vehicle types in the market today.

First generation Ford® Explorers (1991-1994) were equipped with a 4.0 L 155 hp V6 engine and 4-speed A4LD automatic transmission or 5-speed M50D manual transmission. 15 hp was added for the 1993 edition for a total of 170 hp. Much like its predecessor, the Bronco II, the Ford® Explorer was derivative of the Ford® Ranger Pickup, but larger. It came in both 2-door and 4-door bodystyles and was available with rear or four-wheel drive. Explorers came in 4 trim levels: base XL, XLT, Sport (only available on the two-door version), and the upscale Eddie Bauer Edition. The Limited edition, added for 1993, was available only in the 4-door style and was even more upscale than the Eddie Bauer version.

Coming in a range of prototypical colors, these vehicles will look right at home parked in front of our garage kits, out on the streets of your layout, or, for layouts based in late 1992 and on.

#### VEHICLE MODEL FEATURES:

- Simulated rotary beacon
- Side view mirrors
- Head and tail light glazing
- Interior detail
- Simulated rubber tires
- Under carriage detail

#### PROTOTYPE INFORMATION:

The ACF® 8,000 Gallon Type 27 Tank Car was one of the most popular standard design riveted tank cars of the first half of the twentieth century. ACF® built more than 1,800 of these cars for a wide variety of customers in the petroleum, chemical, and food industries. Virtually every bulk liquid or gas of the era was shipped in these cars (and its similar 10,000 gallon brother). Typical products included petroleum, acids, alcohol, propane, ammonia, molasses and vegetable oil.

#### MASTER MODEL FEATURES:

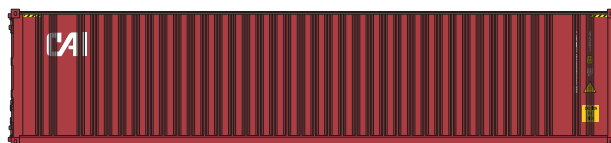

- Die-cast chassis
- Metal grab irons, handrails and stirrups
- Detailed body
- Accurate painting and lettering
- Minimum diameter curve: 0-31 (3-rail)
- Minimum radius curve: 24" (2-Rail)
- Please note: Atlas O body-mounted scale couplers can be used on both 2-rail and 3-rail versions.

#### PROTOTYPE INFORMATION:

The first all-steel cabooses built for the Chesapeake & Ohio Railroad were produced in 1937 by the Magor Car Corporation in Clifton, N.J. Magor, along with St. Louis Car Company and ACE, ultimately built a total of 350 cabooses for the C&O using a similar design. The last were produced in 1949. Through subsequent rebuilding and modernization, many remained in service through the end of regular caboose usage in the 1980s. Cabooses of a similar design were also built for Pere Marquette, Missouri Pacific and Chicago & Eastern Illinois.

#### MASTER MODEL FEATURES:

- Separately applied see-through running boards, window awnings, window glazing, smoke stack, brake wheels and roof grab irons
- Premium die-cast couplers and friction bearing caboose trucks
- Weighted, detailed plastic underframe
- Interior lighting with on/off control switch on chassis
- 2-Rail cars feature 33" scale wheels and body-mounted scale couplers
- Accurate and colorful decoration
- Minimum diameter curve: 0-31 (3 rail)
- Minimum radius curve: 24" (2 rail)
- Some assembly required for undecorated models.

ANNOUNCEMENT WINTER 2020

## ATLAS O GOLDEN SPIKE CLUB

# ATLAS O GOLDEN SPIKE CLUB

[shop.atlasrr.com/c-100-ogscx.htm](http://shop.atlasrr.com/c-100-ogscx.htm)

***Become a Member of Atlas O's Golden Spike Club! Don't Delay – Join Today – Memberships for 2020 are Available Now!***

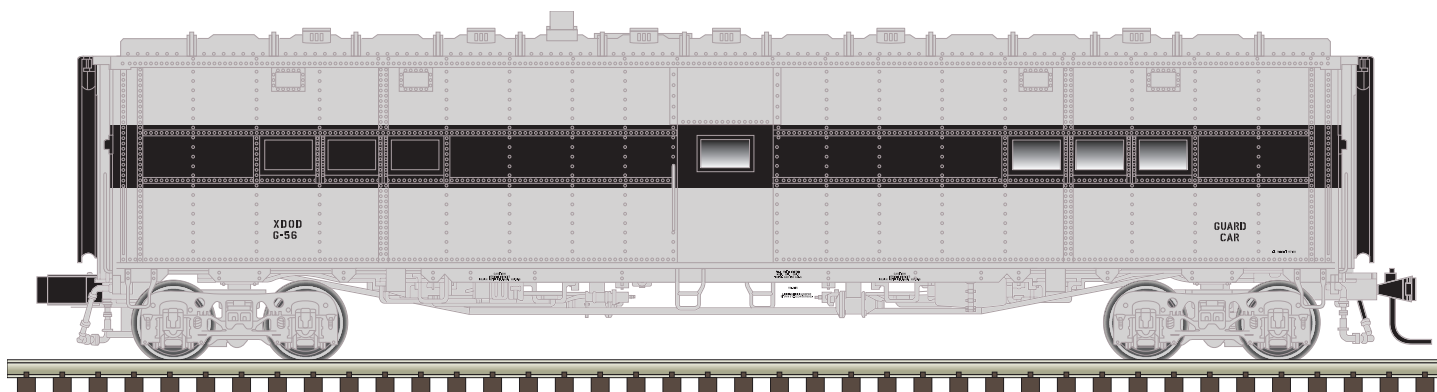

***Sign-up online or download your application today at: [shop.atlasrr.com/c-100-ogscx.htm](http://shop.atlasrr.com/c-100-ogscx.htm) For more information on membership, or to join, please contact Patricia Kimble, Golden Spike Club Coordinator at 908-687-0880 ext. 7122, or via email [pkimble@atlasrr.com](mailto:pkimble@atlasrr.com)***

### THE BENEFITS

Club benefits for all members in all levels include:

- **Laminated membership card:** with member's name and number: The membership card features artwork that changes from year to year, highlighting the annual club car on its front.
- **Club lapel pin (New members only):** Wear it and let your friends know that you're a member of the Atlas Golden Spike Club with this pin, handsomely crafted and sporting the colorful logo.
