N Scale pg. 14-15; HO Scale pg. 32-33

PRE-ORDER ANNOUNCEMENTS - AUGUST 2023

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY OCTOBER 4TH 2023

August 2023

Dear Model Railroader,

The heat of the summer of '23 may thankfully be waning, but the exciting announcements from your Atlas All Scales Monthly Catalogs (ASMC) are not! The Summer Fun, Volume 2 edition of the ASMC is chock full of new announcements like the exciting ATLAS LAYOUT TRACK PLAN OFFER found on pages 22-23, or the latest information about finding and buying that needed Atlas locomotive or rolling stock part, see pages 42-43.

The ASMC is the basis of the distinctive Atlas Guaranteed Pre-Order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after the given "due date", but these can not be guaranteed.

The Summer Fun Volume 2 edition includes announcements of prototypical N and HO locomotives including upgraded sound features in the N scale ALCO S-2 and Dash 8-40C, as well as the HO GP40-2W and RS-32/36. We're also announcing plenty of prototype accurate rolling stock including N & HO scale Trinity 64' Reefers, BX-177 Box Cars and 11,000 Gallon Tank Cars. In HO, the highly sought after Gunderson 7550 Double Door and 7538 Single Door Box Cars return to the lineup! Don't miss Atlas' first ever Z scale rolling stock announcement - the Master line 53' Evans Double Plug Door Box Car - check it out on pages 4-5.

While on the Atlas website, shop.atlasrr.com, be sure to peruse the "New Arrivals" pages to see what has recently arrived on Authorized Dealer shelves, or the In-Stock pages to see what is readily available from Atlas. Recently arrived and now available is Atlas' tried and true N scale True-Track, now with realistic gray roadbed! Take a look at the new roadbed color in the photos on the back cover of this catalog.

Need to do some track work? The 148-page Atlas All Scales Track & Accessories Catalog is just the resource you need! We also offer a full line of instructional guides if you're looking to start fresh with a brand new layout! For more information and a complete listing of our books, visit our website or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, use our handy Dealer locator at <https://shop.atlasrr.com/storelocator.aspx>.

Don't miss out on all of the latest Atlas news, announcements, special offers and more. You can ensure that you receive the latest Atlas news delivered to your inbox by visiting shop.atlasrr.com and signing up for our email newsletter – *the Atlas Insider*.

Thank you for your interest and enthusiasm in the exceptional multi-scale product offerings produced by Atlas Model Railroad Company.

Stay cool,

Drew Postle
Atlas Sales Manager

Mountain Pine Lumber

Northwest Hardwoods

Union Pacific

Wisconsin Central

Z scale is one of the smallest available model railroad scales at a ratio of 1:220. Atlas recognizes the growing interest in Z scale with track offerings and now its first rolling stock model. Z is an optimum size for modelers with space limitations. Relative size of a Z scale model is depicted below using a hand painted model and a US Quarter.

TOTAL PIECES ORDERED					

The Evans 53' Double Plug Door (DPD) box car was manufactured during the 1960s and 1970s by Evans Products. Commonly used for transporting lumber and paper goods, the RBL (AAR class for an insulated bunkerless refrigerator car with loading devices) classification also allowed for the transport of canned goods and other food products. The double 8' doors eased the loading and unloading process of large cargo.

Due to their versatility the Evans DPD box car remained in service for many decades.

Features of the Atlas Z Scale model (a first for Atlas):

- All New Tooling
- Ready to run
- Crisp painting and printing
- Detailed die cast underframe
- Metal wheelsets
- Knuckle style couplers

TOTAL PIECES ORDERED					

Built by the American Locomotive Company (Alco) the low-hood S-2 was introduced in 1940 to replace Alco's earlier high-hood switchers. The 1000 horsepower S-2 was a turbocharged version of the S-1. There were 1,502 S-2s sold to North American Railroads. The versatility of the S-2s was evidenced by their service on mainline, shortline and industrial railroads.

Features:

- Scaled from actual prototype measurements
- Option for horizontal or vertical radiator shutters
- Fine scale handrails
- Separately-applied coupler cut levers, air hoses, piping, etc.
- Directional LED lighting (includes cab rear headlight)
- Die-cast hood & chassis for improved pulling performance
- Dual-flywheels for maximum performance at all speeds
- Factory-equipped with AccuMate® knuckle couplers
- Exceptional painting and printing

AccuMate® couplers are made under license from AccuRail, Inc.

TOTAL PIECES ORDERED					

First built for Union Pacific in the late 1980's by General Electric, the DASH 8-40C diesel locomotives were identified by an enlarged exhaust stack and the mounting of the dynamic brake grids in a square-like unit behind the cab, which housed an enlarged equipment blower fan. These six-axle, 4,000 hp engines are still in service today in North America.

Features:

- Separate coupler cut lever
- Directional lighting
- Golden white LEDs
- Painted safety rails
- Blackened metal wheels
- Dual flywheel equipped 5-pole skewed armature motor with a low friction mechanism
- Factory-installed AccuMate® magnetic knuckle couplers

SILVER SOUND READY FEATURES (SILVER LOCOMOTIVES ONLY):

- Sound ready & equipped with speaker for easy conversion to DCC sound.

DCC OPERATION FEATURES (GOLD LOCOMOTIVES ONLY):

- Supports all DCC-programming modes; DCC includes RailCom and RailComPlus, with 14, 28 or 128 speed steps and with 2-digit and 4-digit addressing.
- Flexible mapping of function keys F0 to F28.
- A total of 6 DCC function outputs are available, and all can be function mapped (disable, brightness, light effects) individually
- Follows all NMRA DCC standards and recommended practices.

SOUND FUNCTIONALITY FEATURES (GOLD LOCOMOTIVES ONLY):

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are up to 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Equipped with ESU's Exclusive "Full Throttle" features for ultimate realism in prototype running.

AccuMate® couplers are made under license from AccuRail, Inc.

The refrigerated box car has long been a staple of railroading, delivering a wide variety of perishable goods from coast to coast. TrinityRail's 64' reefer is a modern take on the reefers of yesterday. Built by TrinityRail starting in late 2003, the ultra-modern 64' Refrigerated Box Car was designed to replace aging reefer cars. Large enough to fit the equivalent of four 53' trailer contents, these excess height, plate "F" cars have given new life to the once flourishing rail transport of refrigerated produce and other perishable goods. These cars feature modern refrigeration to transport produce, orange juice, frozen contents and more across the country while keeping the temperature constant. These cars have distinctive end platforms with an A/C unit and a fuel tank underneath.

Features:

- Carrier Reefer Unit
- Ready-To-Run
- Fine-Scale Detail
- Accurately Painted/Printed
- Prototypical Ride Height
- 100-Ton Trucks
- 36" Metal Wheels
- Brown Knuckle Couplers

Built by ACF® from 1940-1953, the 70-Ton Hart Ballast Cars were formally known as "Hart Selective Service Ballast Cars", due to the use of specially-designed doors which allowed the lading to be discharged one of three ways: to the center of the rails, to the center and sides of the rails, or to the side of the rails only.

Features:

- Die Cast Chassis
- 70-ton friction bearing trucks
- Accumate® offset shank coupler
- Fully detailed interior, including cross-bracing and side stiffeners
- Accurate painting and printing

AccuMate® couplers are made under license from AccuRail, Inc.

Custom-built by ATSF in 1975, a total of 500 BX-177 boxcars were built at Santa Fe's car shops in Topeka, KS. Measuring 61'6" in length (66' 1/2" over the strikers), this icon of beer transportation has proven invaluable to the Santa Fe and then the BNSF. With over 40 years in service and a dozen plus paint schemes between Santa Fe and BNSF, these boxcars are still serving major breweries with pride.

A few notes about the prototype:

- ATSF 621600-622099 (Qty. 500)
- Built at Topeka shops July-Nov. 1975
- ATSF "Super Shock Control" underframe with Keystone 20" travel Center-of-Car cushion device
- Youngstown (YSD) steel car sides and plug door with 10'-6" opening
- Stanray (SRE) Improved Dreadnaught ends and welded X-panel roof
- Originally equipped with Equipco "ACB" (air cushion) movable bulkheads
- Final (last) insulated cars built by ATSF
- In-service 40+ years

Features:

- Ready to run
- Ultra-fine detail
- Accurate painting/printing
- Prototypical ride height
- 100-ton Trucks
- 36" metal wheels
- Separately applied cut levers
- Trainline air hoses
- Etched metal cross over platforms

The model is designed based on Bx-177 construction drawings from ATSF, YSD and SRE.

Propane or Liquefied Petroleum Gas (LPG) is both a naturally occurring product and a by-product of the refining process. During the 1940s, the petroleum industry began marketing LPG as a cleaner and more efficient fuel than the existing coal and oil. Transporting LPG requires specially designed high-pressure tank cars. During the early 40s the only ACF tank car that qualified was the 10,500 gallon high-pressure tank car. After the war, ACF set out to design a whole new car for the emerging industry. As a result the 11,000 gallon tank car was introduced by ACF in 1947. Many thousands were built up through the mid-1950s.

The Atlas model faithfully reproduces this late steam/early diesel era tank car in two versions (with and without platform rails). The cars with top platform rails were used where there was no elevated loading/unloading facility. The cars without the top platform rails were often specified for customers that had access to elevated loading and unloading facilities.

Features:

- Finely molded handrails
- Tank fittings and safety placards
- 50-ton friction-bearing trucks with AccuMate® couplers
- Accurate painting and lettering
- Platform where appropriate

AccuMate® couplers are made under license from AccuRail, Inc.

+Paint scheme is correct for car of a similar prototype.

Atlas Track Planning Software

Atlas is proud to offer Atlas Track Planning Software to help you design your dream layout. This software allows you to create & customize a layout, view it as a 3D model and then generate a shopping list to make your dream layout a reality.

Note - this software works on Windows OS only.

Features:

- Select pieces from Atlas' 9 track lines and build your dream layout with ease
- Model flex-track routes in an easy, intuitive and realistic way
- Arrange your layout on multiple levels with different heights and grades
- Easily draw figures to create train stations, houses, industries, roads and infrastructure
- Use the 3D tool to bring your layout to life
- Measure distances and track section lengths
- Export, Print or Share your layout with your friends
- View and print a list of the Atlas track pieces you need to begin building your layout
- Layout libraries will be available with future library updates

Atlas Track Planning Software 3-D viewer

LAYOUT TRACK PLAN OFFER

Choose layout track plans in N, HO and O scale.

of your choice. From now until September 21st, 2023 Atlas is offering (s, etc.) for the layout plan purchased from your Atlas Authorized Consumers in this process as needed.

No Matter the Scale, No Matter the Space - Atlas Has the Layout For You!

N CODE 80: N-7 TWICE AROUND VIA "UP & OVER"

From Book #6: *Introduction to N Scale Model Railroad*

Minimum Table Size Required: 32" x 45"

Products Required: Straight sections, radius sections, turnouts, a crossing, bumpers, insulated joiners and terminal joiners, necessary electrical components

If you enjoy watching a long train work its way up and down the grades of a long winding main line, the N7 is the layout for you. On this layout, yard tracks are available for breaking up and storing long trains, and a passing track with two industry spurs is available to provide additional operating diversions.

N SCALE CODE 55: N-504 PLATTSBURG PRETZEL

From web site: www.atlasrr.com **Minimum Table Size Required:** 2' x 5'

Products Required: Straight & radius sections, turnouts, a crossing, terminal joiners, bumper and a selector

Take an ordinary oval track, twist one end and you have one of the most popular track plan elements: the Figure 8. The Plattsburg Pretzel is a Figure 8, keeping operation interesting by making the train appear to reverse its direction as it proceeds. This layout also adds interest by adding a spur for more train enjoyment.

HO CODE 83/100: HO-7 THE JUNIOR PRETZEL

From Book #9: *Beginner's Guide to HO Model Railroad*

Minimum Table Size Required: 6' x 8'

Products Required: Straight sections, radius sections, Snap-Switches, rerailers, terminal sections, a crossing, bumpers, rail joiners and the necessary electrical components

Since it is built on an extended platform, there are many possibilities with the HO-7; such as longer runs, longer trains and more realistic operations.

O 3-RAIL: O-22 JANESVILLE JUNCTION

From Book: *Atlas O 3-Rail Layout Book*

Minimum Table Size Required: 5' x 10'

Products Required: 68 pieces of sectional track, 4 remote switches, 4 crossings, and the necessary electrical components, rail joiners, track screws and layout wire.

This layout connects two figure eights with a quadruple crossing so trains can travel in multiple directions. A simple, yet interesting layout, this track plan is great for the modeler who loves to see trains run.

Layout selection, purchase and delivery is easier than ever. Review the layouts online, detailed in the noted layout books, outlined in the Atlas All Scales Track and Accessories Catalog (call 908-687-0880 for a free copy), or create your own with the Atlas Track Planning Software tool. Make your selection with the help of your Atlas Authorized Dealer (<https://shop.atlasrr.com/storelocator.aspx>) or call Atlas for assistance. Upon track availability and payment, Atlas will drop ship the selected layout track plan directly to the buyers home. Allow up to 21 days for delivery following payment.

Canadian National (Zebra Stripes)

Guilford

In 1973 Canadian National (CN) designed the safety cab, also known as the comfort cab, which featured a full-width nose that was intended to improve crew safety in the event of a collision. The first CN locomotives to feature this cab were GMDD GP38-2s and MLW M420s. GO Transit ordered the first safety cab equipped GP40-2s in 1973 with a three-unit order. CN then ordered their first safety cab GP40-2s from GMDD in 1974. Using CN's locomotive classification system, these locomotives were assigned the designation GF-430 (General Motors, Freight, 4-axle, 3000hp). Letters are added after this designation to denote the separate orders for a given model.

Our model represents the GF-430d series, of which 34 were built in 1976: CN 9633-9667. This order was constructed using a standard GP40-2 frame. Earlier GF-430 models were built on a frame that was a noticeable 4-5 inches taller. GO Transit would order a total of 11 safety cab equipped GP40-2s and all were built with similar dimensions to the CN GF-430d series. These units were later sold to Canadian National and renumbered as CN 9668-9677.

The terminology "early" and "late" is used when referring to various road names on this run. "Late" CN and former CN units feature ditch lights, snow shields and have their air horn relocated to the top of the long hood.

This GP40-2(W) model features many prototype-specific and separately-applied details, including:

- Dynamic brakes as appropriate per road name
- 3,000 Gallon Fuel Tank
- CN-Style Lighted Ditch Lights (optional)
- Snow Shields (optional)
- Round or Square Sand Fill Hatches
- Cab-Mounted Bell
- Three-Chime Air Horn Mounted on Cab or Long Hood
- Etched Metal Radiator Fan Grilles

Also includes "standard" features of the GP40-2 model:

- Golden-white LEDs
- Realistic die-cast underframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers
- Detailed cab interior with crew figures
- Separately-installed scale windshield wipers, grab irons and fine scale handrails
- Movable drop steps
- Walkway safety tread
- Coupler cut levers
- Multiple unit hoses and trainline hoses
- Snowplow

AccuMate® couplers are made under license from AccuRail, Inc.

Penn Central 2032

Tishomingo Railroad 211

Tishomingo Railroad 212

Designated as a "DL721" by ALCo, the 2,000hp RS-32 was intended to compete with EMD's GP20 and GE's U25B locomotives. Only 35 units were produced, with 25 units ordered by New York Central in 1961 and 10 units by Southern Pacific in 1962. New York Central's RS-32s were commonly seen in both road and local freight assignments. Southern Pacific's units were initially used in road service, but later settled into local freight service in San Francisco's "commute" territory. Here they were sometimes called upon to rescue stalled commuter trains. They later migrated across the system, ending their SP careers in Texas during the late 1970s with various other ALCo models.

Designated as a "DL701" by ALCo, the 1,800hp RS-36 was only slightly more successful than the RS32, with a total of 40 units produced between 1961 and 1963. Interestingly the DL701 designation was also used for the RS-11 locomotive, and this has been the cause of some confusion when tallying fleet rosters. The largest purchaser of RS36s was Delaware & Hudson with a total of 12 units. These units served the D&H well, operating in road and local freight service through the 1980s. A few units even lasted into the 1990s holding yard and local assignments, serving their original owner for nearly 30 years. Norfolk & Western eventually amassed a larger fleet than the D&H, with the acquisition of Nickel Plate's 11 units, giving N&W a total fleet of 17 units (some with high short hoods). Other original owners included Tennessee Central, Apache, Atlantic & Danville and Chicago & North Western (single unit order).

Given their very low production numbers, it is interesting to note that a handful of RS-32 and RS-36 locomotives can still be found in service today on a few US shortlines and tourist railroads.

The refrigerated box car has long been a staple of railroading, delivering a wide variety of perishable goods from coast to coast. TrinityRail's 64' reefer is a modern take on the reefers of yesterday. Built by TrinityRail starting in late 2003, the ultra-modern 64' Refrigerated Box Car was designed to replace aging reefer cars. Large enough to fit the equivalent of four 53' trailer contents, these excess height, plate "F" cars have given new life to the once flourishing rail transport of refrigerated produce and other perishable goods. These cars feature modern refrigeration to transport produce, orange juice, frozen contents and more across the country while keeping the temperature constant. These cars have distinctive end platforms with an A/C unit and a fuel tank underneath.

Features:

- Carrier Reefer Unit
- Ready-To-Run
- Fine-Scale Detail
- Accurately Painted/Printed
- Prototypical Ride Height
- 100-Ton Trucks
- 36" Metal Wheels
- Body-Mounted Kadee #156 Couplers

TOTAL PIECES ORDERED					

Custom-built by ATSF in 1975, a total of 500 BX-177 boxcars were built at Santa Fe's car shops in Topeka, KS. Measuring 61'6" in length (66' 1/2" over the strikers), this icon of beer transportation has proven invaluable to the Santa Fe and then the BNSF. With over 40 years in service and a dozen plus paint schemes between Santa Fe and BNSF, these boxcars are still serving major breweries with pride.

A few notes about the prototype:

- ATSF 621600-622099 (Qty. 500)
- Built at Topeka shops July-Nov. 1975
- ATSF "Super Shock Control" underframe with Keystone 20" travel Center-of-Car cushion device
- Youngstown (YSD) steel car sides and plug door with 10'-6" opening
- Stanray (SRE) Improved Dreadnaught ends and welded X-panel roof
- Originally equipped with Equipco "ACB" (air cushion) movable bulkheads
- Final (last) insulated cars built by ATSF
- In-service 40+ years

The model is designed based on Bx-177 construction drawings from ATSF, YSD and SRE.

Features:

- Ready to run
- Ultra-fine detail
- Prototypical ride height
- 100-ton Trucks
- 36" metal wheels
- Separately applied cut levers
- Trainline air hoses
- Etched metal cross over platforms

Propane or Liquefied Petroleum Gas (LPG) is both a naturally occurring product and a by-product of the refining process. During the 1940s, the petroleum industry began marketing LPG as a cleaner and more efficient fuel than the existing coal and oil. Transporting LPG requires specially designed high-pressure tank cars. During the early 40s the only ACF tank car that qualified was the 10,500 gallon high-pressure tank car. After the war, ACF set out to design a whole new car for the emerging industry. As a result the 11,000 gallon tank car was introduced by ACF in 1947. Many thousands were built up through the mid-1950s.

The Atlas model faithfully reproduces this late steam/early diesel era tank car in two versions (with and without platform rails). The cars with top platform rails were used where there was no elevated loading/unloading facility. The cars without the top platform rails were often specified for customers that had access to elevated loading and unloading facilities.

Features:

- Finely molded handrails
- Tank fittings and safety placards
- 50-ton friction-bearing trucks with AccuMate® couplers
- Accurate painting and lettering
- Platform where appropriate

AccuMate® couplers are made under license from AccuRail, Inc.

+Paint scheme is correct for car of a similar prototype.

**CSX Licensed Product*

ACF introduced the 5250 cubic foot size covered hopper in 1964, and has since built nearly 20,000 cars. Most of the cars were equipped with pneumatic outlets and eight 20" round hatches for use in transporting plastic pellets. In addition to the plastics cars, a number have been built or converted with gravity outlets and elongated hatches for grain type products. As with most things with long production spans, the design has evolved with changes in the physical features of the body and fixtures. The Atlas model features three unique body style variations to represent those changes from the 1960s into the 21st Century.

Features:

- Ready to run
- Injection molded plastic
- Fine scale detail
- Etched metal roof walk
- Metal knuckle couplers
- Road specific hatch and outlet configurations
- Road specific roof walk variations
- Three body style variations
- Separately applied wire grab irons and wire brake lines
- Crisp painting/printing
- Free-rolling 100-ton trucks

TOTAL PIECES ORDERED					

In 2012, BNSF acquired close to 600 Gunderson 7538 High Capacity box cars. Four years later, TTX Corporation placed orders for a similar 7550 box car. At this time, they have over 4,000 cars in their fleet with more cars ordered. With a gross rail load capacity of 286,000, these cars can carry a wide variety of products such as paper and bulk items. While they look similar in appearance, the 7550 and 7538 have a few unique differences. The 7550 features "grid sides" and double plug doors. The 7538 has a single plug door and a unique door step, just below the left side of the door opening. With both companies operating large fleets, these cars are sure to be seen in large manifests, short lines and on sidings throughout North America.

Features:

- Separate ladders, hand brake and door rods
- Door stirrup, unique to the 7538
- Single or double plug door as per the prototype
- Roof with 3 Stanray X-panels and 3 diagonal center panels
- Brake arrangement offset to A end of body
- Crisp, accurate lettering and paint details
