# 2023 HOLIDAY GIFT CATALOG

Holiday Items & Gifts in N, HO & O Scales

ITEMS AVAILABLE WHILE SUPPLIES LAST!

Dear Model Railroader,

Tis the Season to start shopping! Autumn is here, and leaves have turned orange and yellow, but Atlas is gearing up for the red and green of Christmas season! To that end, we have collected a selection of holiday inspired model railroading items for gift giving or simply to help you set the scene under your tree!

The pages within offer a selection of train sets and track starter sets, as well as scenic accessories and more for those of you who are ready to bring the world of miniature railroading around the Christmas tree.

If you want to see your child's face light up brighter than the star on your tree, you're going to want Santa to bring them the Atlas Trainkids Passenger Train Set this Christmas. This battery powered set is offered in an Amtrak® scheme as well as a fun Glow-In-The-Dark style. Both are easy to operate, fun to play with and geared towards children aged 4 and up! (But that doesn't mean adults can't join in the fun as well. Don't worry, we won't tell.)

We hope that you enjoy the product selections on the pages within, and as always, thank you for your continued support of Atlas!

Happy Modeling & Happy Holidays,

Drew Postle  
Atlas Sales Manager

**O TURNTABLE**

In the steam era, many railroads used turntables to turn locomotives for their next journey. Railroads still use turntables to assist in the maintenance of diesel locomotives and rolling stock. Based on a Santa Fe prototype, Atlas O has realistically duplicated its above ground details, so adding a working turntable has never been simpler. What's more, everything is included for easy tabletop installation.

(Operator Shed)

**FEATURES:**

- Larger and more powerful motor
- Flat cogged anti-slip belt
- Deck support with more roller bearings for greater support of heavier locomotives
- Redesigned metal contacts to power the rotating track
- Drive assembly is hidden under the utility shed
- Table diameter: 24"
- Proven Geneva-gearing for positive indexing
- Can be used for both 3 rail and 2 rail operation
- Will run on AC or DC power
- Compatible w/ TMCC & DCS (using TMCC or DCS accessory interface)
- Compatible with DCC (using a stationary decoder)
- Molded in appropriate colors
- Complete hook-up instructions
- Easy tabletop installation
- Motor Drive included in box for smooth and easy operation
