## N MASTER U25B LOCOMOTIVES

[www.atlasrr.com/NLoco/nu25b5.htm](http://www.atlasrr.com/NLoco/nu25b5.htm)

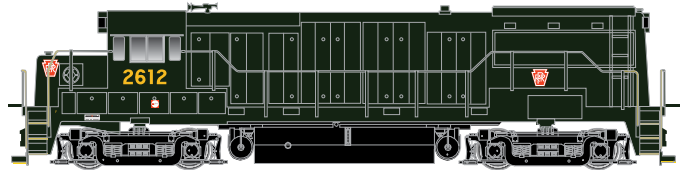

Atlas' high quality N scale locomotive is modeled after GE's U25B introduced in the 1960s. The U25B locomotives were a common sight on railroads across the country. This replica has the same high detail and standards you have come to expect from an Atlas locomotive.

## N MASTER 42' COIL STEEL CAR

[www.atlasrr.com/NFreight/n42coilcar1.htm](http://www.atlasrr.com/NFreight/n42coilcar1.htm)

*The increased volume of coiled steel transportation gave rise to a new purpose-built freight car. Previously rolls of coiled-steel had generally traveled in specially equipped gondola cars. In the 1960s, a lighter type of car emerged specifically for hauling coils of steel in an integral trough. The car type gained popularity and eventually over 17,000 cars were built. Atlas' model replicates a 42' design with a distinctive fishbelly side sill.*

# DECEMBER 2012 ANNOUNCEMENTS

ESTIMATED DELIVERY: 3rd Quarter 2013

## HO MASTER GP40-2(W) LOCOMOTIVE

[www.atlasrr.com/HOLoco/hogp40-2w1.htm](http://www.atlasrr.com/HOLoco/hogp40-2w1.htm)

In 1973 Canadian National (CN) designed the safety cab, also known as the comfort cab, which featured a full-width nose that was intended to improve crew safety in the event of a collision. The first CN locomotives to feature this cab were GMDD GP38-2s and MLW M420s. GO Transit ordered the first safety cab equipped GP40-2s in 1973 with a three-unit order. CN then ordered their first safety cab GP40-2s from GMDD in 1974. Using CN's locomotive classification system, these locomotives were assigned the designation GF-430 (General Motors, Freight, 4-axle, 3000hp). Letters are added after this designation to denote the separate orders for a given model.

Our model represents the GF-430d series, of which 34 were built in 1976: CN 9633-9667. This order was constructed using a standard GP40-2 frame. Earlier GF-430 models were built on a frame that was a noticeable 4-5 inches taller. GO Transit would order a total of 11 safety cab equipped GP40-2s and all were built with similar dimensions to the CN GF-430d series. These units were later sold to Canadian National and renumbered as CN 9668-9677.

The terminology "early" and "late" is used when referring to various road names on this run. "Late" CN and former CN units feature ditch lights, snow shields and have their air horn relocated to the top of the long hood. "Early" CN units and GO Transit units do not include ditch lights or snow shields, and the air horns are mounted above the bell.

The Atlas Master® Series Gold versions of these locomotives are able to use all of the QSI® Quantum System™ sound features on DC layouts with use of the Atlas Quantum Engineer™.

This GP40-2(W) model features many prototype-specific and separately-applied details, including:

- Two Rear Long Hood Styles: CN (single light w/o number boards) and GO Transit (dual lights w/number boards and class lights).
- 3,000 Gallon Fuel Tank
- CN-Style Lighted Ditch Lights (optional)
- Snow Shields (optional)
- Round or Square Sand Fill Hatches
- Cab-Mounted Bell
- Three-Chime Air Horn Mounted on Cab or Long Hood
- Etched Metal Radiator Fan Grilles

### ATLAS MASTER™ SERIES SILVER ADDITIONAL FEATURES:

- NMRA 8-pin plug for DCC (Decoder-ready)

### ATLAS MASTER™ SERIES GOLD ADDITIONAL FEATURES:

- Electronic Dual-Mode® Decoder (e-DMD) that allows your locomotive to run in DCC or traditional DC

### STANDARD FEATURES INCLUDE:

- Golden-white LEDs
- Movable drop steps
- Coupler cut levers
- Directional lighting
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Factory-equipped with AccuMate® knuckle couplers
- Detailed cab interior with crew figures
- Separately-installed scale windshield wipers, grab irons and fine scale handrails
- Realistic die-cast underframe
- Walkway safety tread
- Snowplow
- Multiple unit hoses and trainline hoses

### QSI® QUANTUM SYSTEM™ FEATURES INCLUDING: (ATLAS MASTER SERIES GOLD LOCOMOTIVES ONLY)

- Dual speaker system
- Squealing brakes
- Air let-off in neutral
- Coupler impact sounds when operated with DCC
- Helper mode that mutes the whistle and bell for double heading
- And more!
- Authentic diesel engine sounds
- Doppler effect

Note: Due to the higher starting voltage required to operate the sound system, it is not possible to MU a non-sound-equipped loco in DC (analog) mode

## HO MASTER CYLINDRICAL HOPPERS

[www.atlasrr.com/HOFreight/hocylin6.htm](http://www.atlasrr.com/HOFreight/hocylin6.htm)

Introduced in 1961 by ACF® to haul sand, clay, salt, grain and bulk plastics, the Cylindrical Hopper was the first commercially successful tank-type covered hopper car design. A few of the more than 4,000 cars of this type built through 1966 can still be seen in service today across the United States.

## O MASTER 8,000 GALLON TANK CARS

[www.atlaso.com/o8ktanker7.htm](http://www.atlaso.com/o8ktanker7.htm)

The ACF® 8,000 Gallon Type 27 Tank Car was one of the most popular standard design riveted tank cars of the first half of the twentieth century. ACF® built more than 1,800 of these cars for a wide variety of customers in the petroleum, chemical, and food industries. Virtually every bulk liquid or gas of the era was shipped in these cars (and its similar 10,000 gallon brother). Typical products included petroleum, acids, alcohol, propane, ammonia, molasses and vegetable oil.
