AUTHORIZED ATLAS O SPECIAL RUNS

What's So Special about Special Runs from Atlas O?

Atlas O produces specially painted freight cars and locomotives for organizations, clubs, dealers and historical societies. The next few pages represent Atlas O's efforts at "partnering" with a variety of groups to bring you, the modeler, the finest in quality, detail and realistic O scale products. A careful look is all that's needed to see why these cars are widely recognized as having the best painting and printing in the industry.

What's more, most cars are available in both 3-rail and 2-rail. Atlas O encourages you to take a good look and make your calls as soon as possible to the specific special run dealers and groups to ensure your order is included.

Dealers and organizations interested in a Special Run from Atlas O, please call 908-687-9590 and ask for Bob Lawrence.

(Item #3002010)

3-Rail Item #	Road Name/Number	2-Rail Item #	Estimated Delivery
O MASTER™ 53' EXPRESS REEFER			
30 01 010	PFE #X709, #X717, #X723, #X735	30 02 010	April 2008
O MASTER™ USRA 55 TON COAL HOPPER			
8481	Berwind Coal #1628, #1775, #1777, #1783	9481	July 2008
O MASTER™ 36' WOOD REEFER			
8066	Pennsylvania Lines #611023, #611028	9066	Dec. 2008

Four road numbers are available per road name, except for Pennsylvania Lines which has two road numbers.

(Item #9481)

(Item #8066)

B & F HOBBIES

210 Church Street • Wakefield, RI 02879 • Phone: (401) 782-6400
 Email: fcaraccia@cox.net

3-Rail Item #	Road Name/Number	2-Rail Item #	Estimated Delivery
O MASTER™ 40' WOOD REEFER			
8079	Hanley's #1929, #1937	9079	June 2008

Two road numbers are available per road name.

(Item #8079)

ABOUT THE ATLAS MODELER

The Premier Atlas Online Publication!

The Atlas Modeler began publication in May 2007. The goal of the magazine is to provide additional information on Atlas' products, primarily its regular releases of model freight cars and locomotives. The focus is on the prototype, the real things that we make into model form. We hope that our current and potential customers will gain an increased sense of historical connectivity to the scale miniatures we produce. In past issues of The Atlas Modeler we have explored behind-the-scene stories and trivia about grain hoppers, prototype lettering, Evans gondolas, ALCo C420s, plastics hoppers and GP30s.

The Atlas Modeler is published in electronic format. After years of experience with private, academic and government publishers using electronic methods, we chose the PDF format over the HTML format. The PDF format more closely resembles the traditional "page" format familiar with most readers. This format is also more printer friendly using standard letter sized paper. The PDF format is easily saved as a single file and accessible on multiple platforms without the use of a browser.

The printed form of The Atlas Modeler in the Atlas Quarterly All Scale Catalog is a summary only. This version does not include indigenous pagination, volume number, and an editorial page. The full edition appears on line at: www.atlasrr.com/atlasmodeler.htm

ABOUT ATLAS SOUND LOCOMOTIVES

Have You Heard About... ATLAS SOUND?

For the ultimate in realism, Atlas offers the authentic sounds of squealing brakes, horns, whistles and bells in HO and O Scales. Atlas was among the first to offer high quality factory-installed sound, available in our HO Atlas Master® Gold Series, (diesel engines), and Atlas O Master™ 2-Rail Gold Series, (steam and diesel), locomotives.

Atlas sound is provided by QSI Industries, Inc., of Beaverton, Oregon, a leading manufacturer of model train sound technology. QSI® patented technology uses a simple power pack to operate sound in traditional DC mode and allows a locomotive to search for the DCC signal when track power is applied. If it isn't found, the locomotive will automatically default to operate in conventional DC mode. We call this the "eDMD" or the electronic Dual-Mode® Decoder.

QSI® Quantum System™ Features Include:

(Atlas O Master™ 2-Rail Gold Series Locomotives only)

- Powerful speaker system
- Doppler effect
- Air let-off in neutral
- Coupler impact and other sound effects when operated with DCC
- Helper mode that mutes the whistle and bell for double heading

(HO Atlas Master® Series Gold Locomotives only)

- Speaker system
- Doppler effect
- Air let-off in neutral
- Coupler impact and other sound effects when operated with DCC or the Quantum Engineer™ Controller
- Helper mode that mutes the whistle and bell for double heading

Quantum Engineer™ Controller

The popular #325 Quantum Engineer™ Controller now allows DC users to control all QSI® Quantum System™ sound features of their HO Atlas Master® Gold Series locomotives; a benefit previously only available to those with DCC-equipped layouts. You can access all the features without special equipment or wiring! The Quantum Engineer™ Controller is simply wired between a standard DC power pack and the track. In addition to horn and bell sounds, you can access different engine settings and effects such as ditch lights, flange squeal, dynamic brakes, blower/fans, reverse lights and more. Realism is further heightened with additional programming options, locomotive braking, shut-down and start-up procedures, verbal scale speed readout and more!

3-Rail TMCC Equipped Locomotives

The Lionel® Train-Master® Command Control (TMCC) is an electronic control system for O Scale 3-Rail model trains similar to Digital Command Control (DCC), which permits operation of multiple trains on the same track without complex wiring, while providing realistic digitized sounds.

For AC operation, Atlas O's 3-Rail TMCC-equipped locomotives have operating electro-couplers, offer EOB™ Speed Control Technology and are Lionel® TrainMaster® Command Equipped, featuring the RailSounds™ digital sound system, (including horn, bell, diesel-roar sounds, etc.); Crew Talk® (in command), and more. RailSounds™ operates in both conventional and command modes. To hear the realistic sounds of Atlas locomotives for yourself, please visit: www.atlasrr.com/soundboard.htm or www.atlaso.com/osd40b.htm
