

NEW! HO ACF 5250 Covered Hopper

NEW MODEL & NEW TOOLING - 4 DISTINCT BODY TYPES, 4 DIFFERENT ROOF & 6 DIFFERENT HATCH STYLE COMBINATIONS!

 MASTER LINE

COMING SOON!

ACF introduced the 5250 cubic foot size covered hopper in 1964, and has since built nearly 20,000 cars. Most of the cars were equipped with pneumatic outlets and eight 20" round hatches for use in transporting plastic pellets. In addition to the plastics cars, a number have been built or converted with gravity outlets and elongated hatches for grain type products.

As with most things with long production spans, the design has evolved with changes in the physical features of the body and fixtures. Atlas' model will include optional bodies for many of those changes from the Nineteen-Seventies into 21st Century.
