Which scale is right for you? That is the first and most important question you must answer when beginning the hobby of model railroading. Understanding model railroading terminology is essential to your knowledge and enjoyment, so let’s start at the beginning.

Scale = the proportion of the model to the prototype
Gauge = the width of the track, measured between the railheads

There are three main scales of model trains to choose from. The primary determining factor is the amount of space you plan to contribute to your hobby. The smaller the scale, the less space needed to run your layout. The larger the scale, the more room is required. Your layout’s shape, as well as the amount of detail and enhancements you plan to include must also be considered.

**N SCALE:**
N Scale is the second most popular scale and quite small, being 1:160 proportioned to the prototype. Smaller trains will mean less detail, but you can run a large layout in a smaller area than HO. The gauge on the track is 9mm.

**HO SCALE:**
This is the most popular scale and is 1:87 proportion to the prototype. It requires a small area for a layout, using a sheet of plywood or even a bookshelf for some of the smaller layouts, and there are many products available for HO scale modelers. The track it runs on is 16.5mm gauge.

**O SCALE:**
“O” is the largest of the common model trains, with a proportion of 1:48 of the prototype. This requires a larger area than HO or N for a layout and the trains are more detailed. O scale track is 1-1/4” gauge.

Extensive information regarding scales and the specifics of constructing your first layout can be found in the books detailed on page 7, and on our website, located at the bottom of this page.
Once you've chosen a scale, the next step is to choose a layout plan that interests you so you can begin creating your first model railroad. For a look at some of our most interesting and popular layout plans, please see pages 19-22, 27-28 & 34-38 for N scale layout plans, pages 51-54 & 69-78 for HO scale layout plans and pages 98-107 & 121-122 for O scale layout plans.

The quickest and easiest way to begin is with an Atlas train set, which includes everything you need to get set up and running right out of the box! Regardless of your experience level, Atlas offers Starter Train Sets, Track Expansion Packs, Trolley Sets (O scale only) and more to enable you to start and finish with success.

---

### GETTING STARTED IN N SCALE

#### N TRAINMAN® TRAIN SETS - Perfect for the Holidays!
Built with the same detail and long-lasting performance as all Atlas products, these sets offer high performance locomotives and rolling stock! Packed in a convenient, colorful storage box, each set includes a 24" x 30" oval of N True-Track®, a power pack, locomotive, box car, covered hopper, tank car, coal hopper and caboose. The prototypical Code 65 roadbed track included features simulated ballast gray roadbed with mottled color highlights.

**New Train Sets are released every year!**
Log on to [www.atlastrainman.com](http://www.atlastrainman.com) and see what’s currently available!

---

#### N TRACK PACK
Contains all of the Atlas N Scale Code 80 track (black ties, nickel silver rail), including bridges, switches and rail joiners needed to build Woodland Scenics Scenic Ridge Layout Kit. For a complete list of all pieces, please see [www.atlasrr.com/trackpack.htm](http://www.atlasrr.com/trackpack.htm)

---

#### N TRAINMAN® ADD-ON PACK
Turn your existing oval track set into a 24" x 56" Figure 8 with ease! The prototypical N Code 65 roadbed track included features simulated ballast, gray roadbed with mottled color highlights. Figure 8 True-Track® Add-on Packs expand your existing set or add on to any True-Track® layout.

---

To order, please find a dealer near you at [http://locator.atlasrr.com](http://locator.atlasrr.com). For more ordering information and pricing, please see the price list inserted in this catalog.

---

PHONE: 908-687-0880    FAX: 908-851-2550    WWW.ATLASRR.COM    WWW.ATLASO.COM
HO TRACK PACKS
Contains all of the Atlas HO Scale Code 83 track (brown ties, nickel silver rail), switches, bridges and rail joiners needed to build Woodland Scenics Layout Kits. For a complete list of all track pieces, please see www.atlasrr.com/hotrackpack.htm www.atlasrr.com/trackmisc/hotrackpackr.htm

HO STARTER SETS
Great starter sets are available in three different Atlas HO track lines! A snap for beginners to assemble, these sets come in Code 83 (brown ties, nickel silver rail), Code 100 (black ties, nickel silver rail) and reliable Atlas True-Track® (Code 83 track snapped into gray graveled roadbed). Each contains enough Snap-Track®, Snap-Switches® and components to assemble a 36” x 56” oval layout with passing siding. Complete assembly instructions provided. Power pack sold separately, see page 11.

HO TRAinmAn® TRAin SETS - Perfect for the Holidays!
Offering incredible value at an economical price, each Atlas HO Trainman® Train Set comes complete with a locomotive and matching caboose, three freight cars, an oval of reliable Atlas True-Track®, a power pack and the Blueprints for Ten True-Track® Layouts book; all packaged in a reusable, easy to store box with handle.

New Train Sets are released every year!
Log on to www.atlastrainman.com and see what's currently available!

HO TRAinmAn® ADD-ON PACK
The HO True-Track® in this set features Code 83 “Snap-Track®” with realistic roadbed and accurately sized and spaced brown ties with staggered spike detail, which can be removed from the roadbed. The Figure 8 Track Add-On Pack combines with your existing Trainman® train set track to form a Figure 8.
Getting Started

O STARTER SET
Atlas O’s 21st Century Track® Starter Set will jump-start any level modeler into the fascinating world of model railroading! Available in 3-Rail Premium Nickel Silver, Atlas O’s Starter Set will introduce you to the realism and flexibility of our popular and innovative 21st Century Track® System.

A snap for beginners to assemble, each set contains enough track for a basic oval configuration with 0-36 diameter curves, a free Atlas Track Catalog, and a free Starter Guide to the 21st Century Track® System.

Item #6001 - 3-Rail Premium Nickel Silver Starter Set

O TRAINMAN® TRAIN SETS - With & Without Transformer!
Get quality and performance at a great price! Available in 2 or 3-Rail, each Atlas O Trainman® Train Set contains a locomotive, matching caboose with interior lighting, a complement of freight cars, an 80 watt transformer (also available without) that provides “Old School Performance with New School Electronics” and a circle of track. Multiple road names are available!

New Train Sets are released every year!
Log on to www.atlastrainman.com and see what’s currently available!

O INDUSTRIAL RAIL™ O-27 TRAIN SETS
Colorful and fun, Industrial Rail™ (3-Rail only), the most affordable line of Atlas O products, appeals to the young and the young at heart! Compatible with ALL traditionally-sized O/O-27 trains, these easy-to-use sets contain Industrial Rail™ roadbed track and an 80 watt transformer (see page 11 for more info.). The sets come in a variety of basic configurations of locomotive and freight cars, complemented by the separate sale Industrial Rail™ expansion packs of freight cars and track components.

Get a closer look at www.atlaso.com/industrialrail.htm

To order, please find a dealer near you at http://locator.atlasrr.com. For more ordering information and pricing, please see the price list inserted in this catalog.
**GETTING STARTED**

**O INDUSTRIAL RAIL™ O-27 TROLLEY SETS**
These delightful sets are compatible with traditionally-sized O/O-27 Trains. Each set contains a trolley, station platform, 30 watt transformer (see page 11 for more info.), start-up guide and Industrial Rail™ roadbed track to create a 40” x 50” oval.

See more at [www.atlaso.com/industrialrail.htm](http://www.atlaso.com/industrialrail.htm)

---

**O INDUSTRIAL RAIL™ O-27 TRACK EXPANSION PACKS**
Get quality and convenience at a great price! Expand your existing Industrial Rail™ layout with these easy-to-use track expansion packs, and take your first step in creating the model railroad you’ve always wanted.

![Image of track expansion packs]

**STANDARD TRAIN SET OVAL**
*Take your standard roadbed loop and create something new!*

- **Size - 40” x 70”**
- **Item # 1001001**

**O FIGURE 8 EXPANSION PACK**
- **Pieces Included:** 1 piece 90° Crossing, 4 pieces 5-1/2” Straight, 6 pieces 0-36 Full Curve Track
- **Size - 40” x 92”**
- **Item # 1001000**

**O PASSING TRACK EXPANSION PACK**
- **Pieces Included:** 1 piece LH 0-36 Manual Switch, 1 piece RH 0-36 Manual Switch, 4 pieces 0-36 Full Curve
- **Size - 40” x 70”**
- **Item # 1001001**

**O DELUXE PASSING TRACK EXPANSION PACK**
- **Pieces Included:** 1 piece LH 0-36 Manual Switch, 1 piece RH 0-36 Manual Switch, 1 piece 10” Uncoupling Track, 4 pieces 10” Straight, 4 pieces 0-36 Full Curve
- **Size - 50” x 70”**
- **Item # 1001002**

To order, please find a dealer near you at [http://locator.atlasrr.com](http://locator.atlasrr.com). For more ordering information and pricing, please see the price list inserted in this catalog.
With detailed diagrams, step-by-step instructions, and myriad layout options, Atlas books guide you through every phase of layout building. Each book is aimed at specific skill levels and includes the fundamentals of foundations, track laying, wiring, scenery, as well as a convenient “Products Required” list with each layout. Atlas’ popular and interesting layouts can be viewed throughout this catalog!

#6 INTRODUCTION TO N SCALE MODEL RAILROADING
N scale fun starts here! This complete, easy to read book is ideal for beginners. It’s all here — glossary, tools, benchwork, track laying, wiring, tips and more for nine basic layouts. (N1-N9)

#7 NINE N SCALE RAILROADS
Designed for intermediate modelers, this book details the techniques of benchwork, track laying, wiring and scenery for constructing nine engaging layouts that differ from those in book #6 in their size, detail and sophistication. (N10-N18)

#9 ATLAS BEGINNER’S GUIDE TO HO MODEL RAILROADING
Here’s your ticket to HO fun! Clear diagrams, comprehensive instructions, tips and a chapter on “Finishing Touches” put you on the right track to a successful layout. Blueprints for 12 basic layouts allow for future expansion with either Code 83 or Code 100 track. (HO1-HO12)

#11 HO LAYOUTS FOR EVERY SPACE
Packed with guidelines, shortcuts, tips and 11 layout options for either Code 83 or Code 100 track. More than 75 detailed diagrams make this edition a must for every HO modeler! A chapter on designing your own track plan is also included. (HO13-HO23)

#12 THE COMPLETE ATLAS WIRING BOOK
The Atlas Electrical Wiring System for all scales is made easy. Over 100 updated diagrams are complemented by a complete glossary, step-by-step instructions and advanced techniques.

#13 SEVEN STEP-BY-STEP HO RAILROADS
Whether beginner, intermediate, or advanced, every HO model railroader will find their ideal layout among the explicitly detailed and fully tested plans offered. Eliminate common pitfalls and learn from the many tips included to create your dream layout with Code 83 or Code 100 track. (HO24-HO30)

#14 HO KING-SIZE LAYOUT BOOK
For the intermediate and advanced modelers, this book contains six large layouts in an easy-to-follow scale format. Four plans fold out to become 11” x 17”. Plans can be built with Code 83 or Code 100 track. (HO31-HO36)

#15 BLUEPRINTS FOR TEN HO TRUE-TRACK® LAYOUTS
Fast and easy layouts using popular Atlas Code 83 True-Track® roadbed track. Wiring, tips, accessories and “finishing touches” are all included in this Level 1 book. (TT1-TT10)

#6007-1 ATLAS O 3-RAIL LAYOUT BOOK
This book is a must-have for those who have discovered the superiority of the Atlas 21st Century Track® System. Everything you need for successful layout planning and building is here! Expanded and revised for 2009.

#0140 ATLAS O, LLC 40’ WOOD REEFER COLLECTOR’S GUIDE
This collector’s guide is filled with history, fun facts and over 100 color photos of 40’ Wood Refrigerator Cars making this unique booklet a must for your O scale library.

To order, please find a dealer near you at http://locator.atlasrr.com. For more ordering information and pricing, please see the price list inserted in this catalog.

Layout Tools & Guides

Additional resources and information on layout building is yours in these exceptional reference books published by the Kalmbach Publishing Co., available direct from Atlas!

12175K How to Build Model Railroad Benchwork
Demonstrates how to build the basic framework to support layouts of any size, shape or gauge.

12197K Basic Model Railroading: Getting Started in the Hobby
The basics of track laying, wiring, maintaining locomotives, scenery building, painting, weathering, and detailing models is presented in this up-to-date reference.

12207K Easy Model Railroad Wiring, 2nd Ed.
Everything you need to know about wiring a permanent layout including two-rail DC-powered layouts and the basics of DCC is covered in this how-to guide.

12212K Basic Wiring for Model Railroaders
Learn how to get your locomotive, train set or complete model railroad operating—even if you don’t understand the principles of electricity.

12235K Trackwork and Lineside Detail For Your Model Railroad
An essential reference for modeling track work that performs as well as it looks, this book details working with flexible track, laying track by hand, ballasting and weathering track and more in explicit detail.

12242K DCC Made Easy
Answers all your questions about DCC. Explains methods and techniques, covers the history and dissects the components of a DCC system, and includes step-by-step projects that help readers understand skills, tools and products easily.

Build the World's Greatest Hobby Layout Using Atlas True-Track®!
This basic 4’ x 8’ complete layout is the perfect place to begin your journey into the wonderful world of model railroading with Atlas’ premium all-in-one True-Track® roadbed track. Added bonus: 66-minute video, “Building Your First Model Railroad”!
See more at www.atlasrr.com/trackmisc/hotrackpackw.htm

Below is a list of the products you’ll receive in the World’s Greatest Hobby Track Pack.

Right Track Software 10.0

With Atlas’ Right Track Software (Version 10.0 - Freeware), beginners or advanced modelers can design a layout of just about any size using Atlas N, HO and O scale Super-Flex track, sectional track, switches, electrical components, bridges and buildings. Draw in the size and shape of your layout table, place and connect track, add elevations, helices, road bed and much more! Print out a list of products and a blueprint of your custom-designed layout, and you're on your way to construction.

The new RTS Version 10.0 contains the same quality features and functionality as earlier versions, but has been updated with exciting new features and tools! The new version complete with updated features is now available for download.

Get your FREE copy at www.atlasrr.com and start designing today!

Right Track Software Version 10.0 - New Features!

1. RTS 10 comes with a fantastic new tool for creating 3D structures (PartComp3D). You will find it in the RTS start-menu. The image to the right is an example of what can be done with it:

2. If you insert elements, no matter if you are using the Tool-Place element, the clipboard or the command Edit-Add Layout, the shape of the elements to be added appears next to the mouse cursor, so that you get a better idea of where a mouseclick will place the element(s).

3. You can freely choose the position of the frames (no fixed distance between the frames required any more).

4. Flex sections can now be added without connecting them to existing track sections and they can then be shaped as required.

5. And last, but not least: The new benchwork concept with support for modular layouts:
   - Benchworks now can be of any shape, and a single layout now may contain as many benchworks as you like. The benchworks can be moved and rotated on the workspace, and of course it is possible to align the benchworks. Benchworks act as containers for all elements placed on them; if you move the benchwork, the elements it contains will move as well.
   - Several new tools exist for manipulating the benchworks; the arrow-tool will not work for them. The 3D-terrain is also part of the benchwork and therefore can be moved and rotated as well. You can add tags for the position of track sections and catenary masts using the tool Benchwork-Edit/Create Track Position. Track sections and catenary masts placed on these positions will be positioned exactly and aligned accordingly.
   - If your layout contains at least one benchwork, frames will be created only for the benchworks.
   - Tagged elements (including benchworks with all elements they contain) can be exported to a new file and of course it is possible to import them again.
   - All in all the new benchwork concept offers all features needed to support modular layouts.
6. The 3D-view now simulates the sun so that, for example, a sphere now doesn’t look like a simple circle any more. Here the same scene is shown without and with light:

7. You now may stack benchworks.

8. A new command in the Element menu resets all gradients and heights to 0 in one go.

9. A new command in the Properties menu quickly moves elements to another layer.

10. Another new command in the properties menu enables you to change the line width without opening the Element-Properties dialogue.

11. You may insert a ruler onto your layout and place, move and rotate it like any other element.

12. The new command Separate Layer of the Element menu loosens all connections between track sections placed in different layers.

13. RTS 10 now uses a drop-down list to choose colors, so that you can select the most common colors without opening another window. A click on “Custom” will open this window when required:

14. The feature that fills gaps now produces better results, especially for straight connections.

15. The shape of the chosen element now appears at the mouse cursor even with the tool Place track and connect.

16. Updated track and accessory libraries for N, HO and O scales.
We’ve spent years designing and perfecting what we believe is the easiest and most reliable electrical wiring system in model railroading today. Practical for all scales, the system consists of multiple sets of the most often needed switch types, internally pre-wired by printed circuitry. With Atlas’ electrical components, the magic of train operation comes to life!

SELECTOR #215
This device enables the operation and control of two trains at the same time. It has four single-pole, double-throw switches to provide two-cab operation for four blocks and may be ganged together in any number to control additional blocks without inter-switch wiring. The Selector can be used as area selectors for four-cab operation, and couples with the #220 Controller.

TWIN #210
The Twin is a component consisting of two double-pole, double-throw reversing switches wired in parallel. Useful for reversing section and turntable control on single-cab layouts, plus many other applications.

CONNECTOR #205
A device to turn electric power on or off to track section or accessories. It has three SPST on-off switches in parallel and can be coupled together in any number.

CONTROLLER #220
This Controller provides the simplest way to wire and control tricky reverse loops, wyes and turntables. It has reversing switches for two main line cabs plus a switch, selectable by either cab, for directional control on reversing loops, etc. Couples with the #215 Selector.

SWITCH CONTROL BOX #56
Controls Atlas (or other twin coil) switch machines with SPDT momentary action. Button position indicates turnout setting. It can be coupled together in any number without wiring. Switch identification labels are included.

SPADE TONGUE SOLDERLESS CONNECTOR #201
A handy small electrical hook-up connector designed for tight spaces. Used for #18-22 wire and #3 screw post. Maximum width is .218", 24 pieces per package.

SNAP RELAY #200
The Snap-Relay is a double-pole, double-throw relay with actuating mechanism driven by a momentary-power twin coil solenoid (A solenoid is a cylindrical coil of insulated wire in which an iron core is made to move back and forth by a flow of electric current). With just a few simple connections, this small device, which may be mounted anywhere, can:
- Power the frogs on Atlas’ Code 83 #6 & Mark 3 turnouts in “HO” or Atlas O 2-Rail switches
- Control trackside signal lamps to show turnout point positions
- Operate control panel lamps to show settings of remotely located turnouts (switches)
- Provide selective track siding control; sidings are powered only when points are aligned for siding; siding remains “dead” when points are set for the main line
- Control X-sections automatically; this very useful track arrangement is thoroughly discussed in The Complete Atlas Wiring Book (Item #12)

To order, please find a dealer near you at http://locator.atlasrr.com. For more ordering information and pricing, please see the price list inserted in this catalog.
THE NON-DERAIL CIRCUIT BOARD - WORKS FOR ALL SCALES!
The Atlas Non-Derail Circuit Board adds enhanced operating features to Atlas and most other brands of switches. You no longer have to worry whether your switches (turnouts) are thrown correctly for safe passage of your train or rolling stock. The Atlas Non-Derail Circuit Board will give your layout automatic directional control without worry of your train and rolling stock derailing or causing a short.

The board will also help eliminate problematic switches (turnouts) on your pike where lighted rolling stock or locomotives cause power loss because of insufficient roller spacing.

Features:
- Electronic non-derailing works for ALL scales, be it 3-Rail or 2-Rail
- Power routing of closure rails
- Fully compatible with TMCC/Legacy, DCS, DCC and standard AC/DC control systems
- Interfaces with the Atlas O 21st Century Signal® System
- Will control two switches or turnouts
- Automatic polarity reversing on 2-rail systems

To order, please find a dealer near you at http://locator.atlasrr.com. For more ordering information and pricing, please see the price list inserted in this catalog.
**ALL SCALE ELECTRICAL COMPONENTS**

**HEAVY DUTY ELECTRICAL COMPONENTS**
Introduced by Atlas O, these electrical components are perfect for all scales and feature an upgraded, heavy-duty design. This allows modelers to run higher amperage AC/DC command control systems and all large-scale trains.

**HD Connector**
This handy component contains three single-pole, single-throw on/off switches in parallel. Can be used to turn power on or off to track selections and accessories. Can be used with AC or DC power. New heavy duty design compatible with higher amperage AC/DC command control systems and all large-scale trains. May be ganged together in any number.

**HD Selector**
One of the mainstays of conventional layout control, this component enables the operation and control of two trains at the same time when they are running conventionally. Has four single-pole, double-throw switches that allow two-cab operation of four blocks. Can also be used as area selectors for four-cab operation. New heavy duty design compatible with higher amperage AC/DC command control systems and all large-scale trains. May be ganged together in any number to control additional blocks as required.

**HD Twin**
Consists of two double-pole, double-throw reversing switches wired in parallel. Useful for control of reversing sections as well as turntable operation on single-cab layouts. New heavy duty design compatible with higher amperage AC/DC command control systems and all large-scale trains.

**30 WATT TRANSFORMER (AC)**
Features:
- UL Listed
- Traditional design
- 0-14 volt variable AC output
- On/off power switch
- Power and overload indicators
- Suitable for small AC-powered train sets
- Perfect in all scales as a variable AC accessory power supply

**80 WATT TRANSFORMER (AC)**
Features:
- For 3-Rail/2-Rail AC powered trains
- UL Listed
- Traditional heavy-duty design
- Horn/whistle, bell and direction controls
- 0-18 volt variable AC track power output
- 7-16 volt variable AC accessory power output
- On/off power switch
- Power and overload indicators
- Perfect for all AC powered train sets/medium layouts
- Perfect in all scales as a variable AC accessory power supply for large layouts

**ATLAS UNIVERSAL POWER PACK**
Universal Power pack is made up of 2 pieces—Throttle control and Transformer

**Transformer power features:**
- Input 120 Volts AC 60Hz 24 Watts
- Output 16Volts AC 1000mA 16VA

**Throttle Control features:**
- Illuminated power light
- Dual direction switch
- Circuit breaker protection
- UL Listed
- Separate accessory wire inputs
- No pulse power to damage precision motors
- Spring loaded terminal wire grabs make this perfect for beginners

**RIGHT TRACK POWER PACK (DC/AC)**
Features:
- Upgraded electronics
- Separate power and direction switches
- No pulse power to damage precision motors
- Can power one O-scale locomotive only
- Circuit breaker protection
- Overload indicator lamp
- UL and C-UL listed

To order, please find a dealer near you at http://locator.atlasrr.com. For more ordering information and pricing, please see the price list inserted in this catalog.
The Atlas Parts Department is always striving to serve you better. Parts orders placed by phone are processed promptly, provided the parts are in stock. You may email Atlas at parts@atlasrr.com or call 908-687-0880 during business hours and ask for Customer Service. To view parts diagrams and/or order parts online, visit www.atlasrr.com/hoparts.htm or www.atlasrr.com/nparts.htm

Below are just a few of the over 2,000 parts that Atlas offers to keep you on the Right Track!

HO & N SCALE RAIL JOINERS AND TRACK NAILS

Rail joiners are small clips used to join two sections of track mechanically. They come in metal (nickel silver) which also connects the rails electrically, and plastic which are insulated to isolate the two sections of track electrically.
