PRE-ORDER ANNOUNCEMENTS - WINTER 2026

**PRE-ORDER DUE DATE:
WEDNESDAY MARCH 4TH 2026**

January 2026

Dear O Scale Model Railroader,

Happy New Year and welcome to the Atlas O Premier Catalog - Winter 2026 Edition. This catalog highlights the latest O Scale offerings across the Atlas Premier, Master, and Trainman product lines, including locomotives, passenger equipment, and rolling stock.

Catalogs such as this one play an important role in Atlas's product development process. Before final production decisions are made, Atlas announces upcoming products to give customers and dealers the opportunity to indicate interest through pre-orders placed by the published deadlines. These pre-orders help Atlas evaluate demand and plan production quantities as accurately as possible.

While Atlas makes every effort to meet customer demand, quantities are not guaranteed, particularly for orders placed after the published deadlines. In some cases, Atlas may also offer products identified as Limited Availability, for which production quantities are determined in advance. For these reasons, customers are encouraged to place pre-orders early to improve the likelihood of obtaining desired items.

This Winter 2026 catalog includes select Premier locomotives, as well as Master and Premier rolling stock, offered through Atlas's pre-order program. Atlas O continues to expand its locomotive lineup with the Premier 2-8-0 Steam Locomotive, SD70ACe, and F40PH Passenger Locomotive, all equipped with MTH DCS and Proto-Sound 3.0.

Also featured are new releases across the rolling stock lines, including Premier 50' Gunderson Box Cars, 3-Bay Centerflow Covered Hoppers, Operating Dump Cars, Master Comet and Horizon Passenger Coaches, Troop Sleepers, and Trainman 50'6" Box Cars, all offered in authentic and carefully researched paint schemes. The Industrial Rail series expands as well, with new Plug Door Box Cars, Gondolas, and Tank Cars joining the lineup.

Finally, this catalog serves as a reminder of Atlas O's extensive selection of track, accessories, trackside buildings, and structures, which are available on an ongoing basis. Whether you are updating an existing layout or building a new one from the ground up, Atlas O sales and customer service representatives are ready to assist.

To stay informed about Atlas O products and announcements, we invite you to sign up for the Atlas Insider Email at: <https://shop.atlasrr.com>

Thank you for your continued interest in Atlas O products, and we wish you many enjoyable hours of model railroading.

Sincerely,

Ross Medine
Atlas Sales Manager

New Catalog Features:

- ***New Paint Scheme Index on pages 4-5 - a quick reference highlighting all newly announced paint schemes***
- ***A Detailed Look Behind the Paint Scheme on pages 20-21 - a closer look at select models and the inspiration behind their paint schemes***

Atlas Catalog-Tariff Based Pricing Notice - Prices shown in this catalog reflect current U.S. tariff conditions applicable to imported products at the time pricing was established. Final pricing may be adjusted upward or downward based on changes in tariff policy, timing of importation, and related supply chain costs. Atlas understands that evolving trade conditions affect every part of the supply chain—from production through retail pricing. Where possible, Atlas works to minimize disruption and absorb cost fluctuations in support of long-term relationships with dealers, distributors, and consumers. Atlas continues to actively monitor trade policy developments and participate in industry-wide advocacy efforts. For updates on trade policy and industry initiatives, visit the Hobby Industry Coalition at hobbycoalition.org.

TOTAL PIECES ORDERED					

Prices shown reflect current U.S. tariff conditions applicable to imported products at the time pricing was established.

Final pricing may adjust if tariff rates change before product arrival. Atlas is committed to minimizing disruptions and maintaining reliable supply.

The 2-8-0 steam engine was first developed in 1864-1865 to provide power for heavy trains running at moderate speeds, especially on steep grades. Alexander Mitchell, the chief mechanic for the Lehigh and Maloney Railroad, an eastern Pennsylvania coal hauler, designed the original 2-8-0. The Pennsylvania Railroad (PRR) was the first to put the 2-8-0 type engine on the rails when they rebuilt a Baldwin flexible-beam engine to a 2-8-0 configuration. For more than forty years, the 2-8-0 Consolidation was America's standard freight locomotive, working hard on virtually every railroad.

Our model features a die-cast metal locomotive boiler, chassis and tender, each 2-8-0 is equipped with the state-of-the-art Proto-Sound 3.0 system for an incredible operating experience. You'll be amazed at how slowly and smoothly she runs - up and down grades and around corners with or without a load. And when you see her smoke, with each puff timed to the revolutions of the drivers, you'll know that you've just obtained the best value in model railroading.

The US Army 2-8-0 is a perfect complement to the Troop Cars listed on pages 42-45 of this catalog!

** Prices are subject to change due to board availability/cost.

The DC-motored SD70M-2 and AC-motored SD70Ace are EMD's hope for the future. While designed to meet the Environmental Protection Agency's Tier-2 emissions requirements that took effect on January 1, 2005, they also have a higher purpose: to recapture the lead in North American locomotive sales that EMD lost to General Electric in 1987.

Under the hood of both engines beats a third-generation model 710 diesel with 4300 horsepower; only slight modifications were needed to make the model 710 meet new emission standards. With 5000 such motors in service worldwide and a reputation for dependability, EMD reasoned that shop crews would prefer familiar technology.

Other than the prime mover, however, virtually every element of these engines has been re-thought to create a 21st century locomotive. The engines' angular nose offers the crew far better visibility than most other locomotives, and the cab is comfortable for engineers of almost any size and accommodates a crew of three – an important factor in a modern world without cabooses. Digital screens provide a range of information on what is happening both inside the locomotive and out on the road.

The key difference between the SD70M-2 and the SD70Ace is what's under the floor: traditional DC traction motors in the SD70M-2's trucks and AC traction motors in the SD70Ace. While AC traction motors put more tractive effort on the rails and enable an SD70Ace to start a heavier train with the same horsepower, that additional capability comes at a cost. AC-powered locomotives are both more expensive and more electrically complex than engines with DC traction motors, which most diesels have used since the 1940s.

Prices shown reflect current U.S. tariff conditions applicable to imported products at the time pricing was established. Final pricing may adjust if tariff rates change before product arrival. Atlas is committed to minimizing disruptions and maintaining reliable supply.

PRE-ORDER ANNOUNCEMENTS - WINTER 2026

**PRE-ORDER DUE DATE:
WEDNESDAY MARCH 4TH 2026**

ATLAS PREMIER O F40PH LOCOMOTIVE

Product Info: <https://shop.atlasrr.com/d-749-2026-winter-o-scale-catalog.aspx>

The F40PH was designed for Amtrak as a commuter and medium-haul engine, to complement its long-haul fleet of SDP40F diesels. But when the SDP40Fs fell from grace due to poor reliability, a rough ride and derailment issues, the F40PH became the backbone of Amtrak's locomotive fleet for decades.

Introduced in 1976, the F40PH was essentially a passenger version of the mid-1960s GP40 freight diesel. It shared the earlier engine's turbocharged V-16 3000 hp (later uprated to 3200 hp) model 645 motor, and added an HEP (head-end power) generator for passenger lights, heat and air conditioning. An enclosed cowl afforded en-route, all-weather access to the F40PH's engine room if necessary. In short order, commuter railroads across the United States and Canada followed Amtrak into EMD's order books for this versatile, reliable engine.

Did You Know? The F40PHs were nicknamed "Screamers" because their engines run at a high rpm even at rest, in order to power the HEP generator that keeps the passenger cars comfortable.

These F40PH Locomotives are the perfect complement to the Comet/Horizon Cars listed on pages 34-37 of this catalog!

Features:

- Intricately Detailed, Durable ABS Body
 - Die-Cast Truck Sides, Pilots and Fuel Tank
 - Metal Chassis
 - Metal Handrails and Horn
 - Moveable Roof Fans
 - Metal Body Side Grilles
 - Detachable Snow Plow
 - (2) Handpainted Engineer Cab Figures
 - Authentic Paint Scheme
 - Metal Wheels, Axles and Gears
 - O Scale Kadee-Compatible Coupler Mounting Pads
 - Prototypical Rule 17 Lighting
 - Directionally Controlled Constant Voltage LED Headlights
 - Lighted LED Cab Interior Light
 - Illuminated LED Number Boards
 - Lighted LED Marker Lights
 - Operating LED Ditch Lights
 - (2) Precision Flywheel-Equipped Motors
 - Operating ProtoSmoke Diesel Exhaust
 - Onboard DCC/DCS Decoder
 - Locomotive Speed Control In Scale MPH Increments
 - Proto-Scale 3-2 3-Rail/2-Rail Conversion Capable
 - 1:48 Scale Proportions
 - (2) Remote-Controlled Proto-Couplers
 - Proto-Sound 3.0 With The Digital Command System Featuring
 - Passenger Station Proto-Effects
 - Unit Measures: 15 1/4 x 2 1/2 x 4 1/16
 - Operates On O-31 Curves (3-Rail)
 - 36" Minimum radius (2-Rail)
- 3-Rail DCS Features: (2025 or later)
- Proto-Sound 3.0 With the Digital Command System Featuring Freight Yard Proto-Effects
 - Locomotive Speed Control In Scale MPH Increments
- 2-Rail Gold Features:
- DC/DCC

A Detailed Look Behind

Atlas O Premier SD70Ace Locomotive - Norfolk Southern #1230 "Birmingham"

Atlas model rendering

Norfolk Southern SD70ACe (SD70IAC) units 1230 "Birmingham" and 1231 "Atlanta" are the first two of the NS Landmark Series of specially painted locomotives that will be named for significant cities across the NS system. The units are to operate in regular freight service and pull OCS (Office Car Special) trains when needed. Norfolk Southern has not had designated locomotives for OCS trains since selling their four F units in 2019. The new NS Landmark Series paint scheme combines elements of Norfolk Southern's current corporate identity such as the black and white "Horse Head" logo and elements from Norfolk Southern's past such as the Tuscan red and gold from famous Norfolk & Western passenger trains.

Atlas O Premier 50' Gunderson High-Cube Box Car - CPKC Holiday Train

Atlas model rendering

The CPKC Holiday Train was started by Canadian Pacific (CP) in 1999. It is a festive, colorfully lit train featuring live music and performers that travels across North America (Canada, U.S., and as of 2023 Mexico too!) each December to raise money, food, and awareness for local food banks. The tradition continues to grow even after Canadian Pacific merged with Kansas City Southern (KCS) to form CPKC in 2023. Now the CPKC system features two holiday trains, one for each network, bringing holiday cheer and crucial donations to the communities all along the CPKC system.

With an interior height of about 13 feet - 2 feet more than a standard box car - this car is known as a "hi-roof" or "high cube" car for its high cubic capacity. White end panels make railroad crews aware of its extra height, which prevents it from traveling in some areas.

This 50' 100-ton car is designed specifically for the modern printing industry, which uses large rolls of paper too big for standard box cars. Side-to-floor joints and doorframes are reinforced to accommodate the heavy weight of paper rolls. Longer 60' versions of this design are widely used for transporting parts for car manufacturing.

American Car and Foundry's (ACF's) introduced the Centerflow covered hopper in 1961, followed the next year by Pullman-Standard's competitive PS-2CD covered hopper. Prior to the Centerflow, the typical covered hopper was little more than a coal hopper with a roof. Dry products such as salt were loaded through roof hatches and unloaded by gravity through doors in the floor. Like most freight cars of their era, these cars had a center sill. This support beam ran down the middle of the car between the left and right sets of unloading doors, and that led to problems in emptying the car. Typically some of the load would cake or "bridge" on the center sill, and the car would have to be vibrated to loosen the mess and achieve full unloading. Of course the vibration tended to shorten the life of the car. The Centerflow's key innovation was the elimination of the center sill by relocating the car's main support beams to the bottom edge of each side. This enabled the discharge hopper doors to be located along the centerline of the car, allowing for easier, more complete unloading and banishing the problem of caking on the center sill. In addition, the car sides were curved to allow for more complete filling of the car. Stub center sills at each end provided a place to mount the trucks. The Centerflow was the first larger-capacity covered hopper designed for grain and products of similar density. By the 1980s, ACF's Centerflow, along with covered grain hoppers from other builders, had spelled the end of the 40' box car in grain service. In addition to grain, Centerflows found work hauling a variety of other light to medium-density dry commodities, including salt, clay, chemicals, phosphates and other minerals.

Available in 3-Rail Only.

Side Dump cars are a very versatile class of railroad car, designed to deposit their load to either side of the tracks, rather than between the rails like a ballast hopper. This feature is utilized by the railroads in maintenance-of-way roles for rapidly building up fills and cuts with stone, rip-rap or soil as well as for depositing ballast. Side dump cars are also used in revenue service hauling ore, limestone, gravel, and coal, in industrial settings hauling waste or recycling materials, and in mining operations. Their low sides enable easy loading of material, and their rapid discharge rates – some less than 10 seconds – and ability to take a lot of abuse have earned them the nickname of a “dump truck on rails”.

Features:

- Metal Wheels and Axles
- Die-Cast 4-Wheel Trucks
- Operating Die-Cast Metal Couplers
- Decorative Brake Wheels
- Fast-Angle Wheel Sets
- Needle-Point Axles
- Die-Cast Metal Body
- Operating Dump w/Shake Action
- Unit Measures: 12 1/16 x 2 5/8 x 2 1/2
- Operates On O-31 Curves

Happy 250th Birthday America!

In recognition of the upcoming America 250 celebrations, Atlas is proud to offer a special line up of limited-edition O scale Commemorative themed box cars to celebrate!

The decoration of each commemorative box car offering is based off historically accurate liveries from that specific railroad. These Atlas Collectors' Series models represent an alternate history scenario where these four railroads repainted additional rolling stock into bicentennial schemes for the 1976 celebrations.

Bring a splash of red, white and blue color to your layout with these Atlas Collector Series Box Cars honoring 250 years of American freedom, innovation, and railroading heritage.

Run the rails of history—celebrate America's 250th with pride.

TOTAL PIECES ORDERED					

Available in 3-Rail Only.

The 40' Boxcar is widely known as one of the most popular freight cars used by railroads as they transitioned from steam to diesel. In particular the Pullman Standard or PS-1 design was one of the most popular and was widely used by North American railroads. Pullman had been making freight cars for more than half a century when it hit a home run with the PS-1. Introduced in 1947, it set the standard for postwar American freight cars.

What made the PS-1 a landmark was its welded construction – an area in which Pullman led the industry. In addition to lighter weight, welding offered superior strength and better resistance to weather and corrosion than contemporary riveted cars.

Like the EMD diesels that became ubiquitous on American railroads, the PS-1 was part of the postwar shift away from customized, railroad-specific locos and cars toward standardized designs produced in large quantities on efficient assembly lines. No wonder the PS-1 was soon followed by the highly successful PS-2 covered hopper, PS-3 open hopper, PS-4 flatcar, and PS-5 gondola.

Features:

- Intricately Detailed Durable ABS Body
- Metal Wheels and Axles
- Die-Cast 4-Wheel Trucks
- Operating Die-Cast Metal Couplers
- Colorful, Attractive Paint Schemes
- Decorative Brake Wheels
- Separate Metal Handrails
- Fast-Angle Wheel Sets
- Needle-Point Axles
- Sliding Car Doors
- 1:48 Scale Dimensions
- Unit Measures: 11 5/8" x 2 5/8" x 3 3/4"
- Operates On O-31 Curves

Prices shown reflect current U.S. tariff conditions applicable to imported products at the time pricing was established.

Final pricing may adjust if tariff rates change before product arrival. Atlas is committed to minimizing disruptions and maintaining reliable supply.

ATLAS PREMIER O 40' PS-1 BOX CAR - COLLECTOR & HOLIDAY SCHEMES

NEW HOLIDAY SERIES† PAINT SCHEMES

Bring holiday magic to your layout!

This lighted Christmas O Scale Premier 40' PS-1 Box Car features a whimsical image of Santa that captures the joy, warmth, and playful spirit of the season. With bright festive colors, charming artwork, and authentic O scale proportions, it's the perfect centerpiece for holiday train displays or a delightful addition to any collection. Built with quality and decorated for timeless appeal, this box car delivers cheer on every run and is sure to become a favorite holiday tradition on your rails.

Celebrate Freedom on the Rails!

This lighted 4th of July O Scale Premier 40' PS-1 Box Car brings patriotic pride to your layout with bold red, white, and blue graphics that capture the spirit of Independence Day. Featuring authentic O scale proportions, crisp detailing, and durable construction, it's perfect for holiday displays, special operating sessions, or year-round Americana themes. Whether you are a seasoned collector or adding a festive touch to your train set, this box car is a star-spangled tribute to classic railroading and American heritage.

Based off of a Pullman-Standard design, the Comet II was the successor to these very popular commuter cars. Purchased in large quantities by multiple commuter agencies, their sleek yet modern design features two end doors, built for high and low level platforms, along with bathrooms and Head-End (HEP) A/C and heating. Around the same time, their cousins, the Horizon fleet, were built for longer distance services for AMTRAK. These cars feature 2x2 seating and separate cars for food and beverage services.

Features:

- Full scale length, approximately 21.5"
- Each Comet car is available in both coach and commuter cab versions
- Each Horizon car is available in both coach and dinette versions
- Accurate scale details
- Separately applied metal handrails
- Rubber tubular-type diaphragms on each end (1 on the Comet commuter cab car)
- Interior seating
- Accurate inside-bearing commuter trucks (Comet)
- Accurate-modeled die-cast Superliner II trucks (Horizon)
- Operating tail lights (operating tail lights and headlight on cab car)
- Accurate painting and lettering
- 2 rail version equipped with scale wheelsets and body-mounted Kadee compatible couplers
- Die-cast operating couplers (3-rail)
- Minimum radius (3-Rail): 0-54
- Minimum diameter curve: (2-Rail): 36"

Based on prototypes that were built during the 1960s, these cabooses were popular on railroads from coast-to-coast. With the advancement of the End-of-Train device, cabooses slowly began to fall out of favor. However, in the early 2000's, "shoving platforms" began to appear as a place to safely house a crew when a reverse move was required. Instead of riding on the side of a freight car, the crew member now has a safe place to stand, while guiding the rear of a reverse move. Atlas' shoving platform cabooses will feature blanked out windows (Where appropriate).

**CSX Licensed Product*

Features:

- Illuminated interior w/ crew figures
- Flashing warning light on rear
- All metal grab irons
- Die-cast chassis
- Barber-Bettendorf caboose trucks with rotating bearing caps
- Optional scale couplers supplied with all 3-rail cars
- Minimum diameter curve: O-36 (3-Rail)
- Minimum radius curve: 24" (2-Rail)

Prices shown reflect current U.S. tariff conditions applicable to imported products at the time pricing was established. Final pricing may adjust if tariff rates change before product arrival. Atlas is committed to minimizing disruptions and maintaining reliable supply.

Product Info: <https://shop.atlasrr.com/d-749-2026-winter-o-scale-catalog.aspx>

Wabash (MOW) Troop Sleeper

Burlington Northern Express Box Car (Troop Kitchen Car)

Chicago Burlington and Quincy Express Box Car (Troop Kitchen Car)

During the Second World War, the task of moving large numbers of troops and materiel across the country to ports of embarkation fell to the US railroads. It is estimated that nearly 44 million troops traveled by train between December of 1941 and June of 1945 alone, and the available passenger car fleets were unable to keep up with this sudden increase. The Pullman Company, together with American Car and Foundry, utilized the design of a standard 50'6" boxcar to produce 2400 troop sleepers, 440 troop kitchen cars, and 60 hospital/kitchen cars to meet this demand. Following the war (and the use of these cars to return troops home), in 1947 the majority of these cars were sold to the railroads, who converted them into baggage / mail cars, box cars, MOW bunk / kitchen cars and even cabooses. Others were sold to freight car leasing companies, such as Chicago Freight Car Leasing, who then converted them into express and refrigerator cars for companies such as Railway Express Agency (REA).

In 1974, ACF® built the first box car for Railbox, a subsidiary of the Trailer Train Company. They went on to produce 5,400 50' cars over the next six years, receiving large orders from Class I railroads, shortlines and box car leasing companies who wanted to participate in Incentive Per Diem (IPD). This Atlas O Trainman® box car is a simple, but strong and stunning replica, with beautiful crisp printing that accurately depicts the prototype, and is designed to enhance your layout and provide many hours of reliable operation.

*Prices shown reflect current U.S. tariff conditions applicable to imported products at the time pricing was established.
Final pricing may adjust if tariff rates change before product arrival. Atlas is committed to minimizing disruptions and maintaining reliable supply.*

Plug-door boxcars are a boxcar with a door that seals flush into the car's side (hence the term "plug"), providing better protection from weather and contamination. Its tight seal and smooth interior make it ideal for transporting moisture-sensitive or high-value goods such as paper, food products, and palletized freight. The Atlas Industrial Rail Plug Door Boxcar features a durable plastic body with metal wheel sets and couplers.

Features:

- Die-cast metal trucks and wheels
- Needle point axles
- Detailed brake wheels
- Metal couplers
- Injection molded bodies
- Accurate painting and printing
- Detailed underframe
- Compatible with all traditionally-sized 3-Rail O/O-27 Trains

Prices shown reflect current U.S. tariff conditions applicable to imported products at the time pricing was established.

Final pricing may adjust if tariff rates change before product arrival. Atlas is committed to minimizing disruptions and maintaining reliable supply.

Full center sill tank cars are an older style of tank car where a cylindrical tank is placed on top of a traditional, full-length underframe (chassis), unlike modern "frameless" designs where the tank itself forms the main structural backbone, creating a lower, more efficient car. These vintage cars, common in the early-to-mid 20th century (1920s-1960s), carried various liquids like oils, chemicals, and corn syrup, often with multiple compartments for different products, and were known for their distinct appearance with visible underframes and dome tops. The Atlas Industrial Rail Tank Car features a durable plastic body with metal wheel sets and couplers.

Features:

- Die-cast metal trucks and wheels
- Needle point axles
- Detailed brake wheels
- Metal couplers
- Injection molded bodies
- Accurate painting and printing
- Detailed underframe
- Compatible with all traditionally-sized 3-Rail O/O-27 Trains

GSC Trainman 50' 6" Box Car: Arguably one of the most iconic box cars in North American railroading is the 50' Railbox, the distinctive yellow and black colors make it clear even from afar that this box car is a Railbox! Our 2026 Golden Spike Trainman ACF 50' 6" Box Car Railbox Graffiti car represents what these iconic black and yellow staples of railroading look like today... tired, faded, and full of graffiti! Unique to this Golden Spike Club offering is the "Railfan" bullet train graffiti on the "B" side of the car. For a full list of features, see page 49.

GSC Premier 3-Bay Centerflow Covered Hopper: "Aristocrat Coal" or formally known as anthracite coal is a high-carbon, clean-burning type of coal, historically considered a premium, or "aristocrat," fuel source. The Reading & Northern Railroad is central to the modern anthracite coal industry, exceeding one million tons of coal shipped for several consecutive years! This particular Golden Spike Club offering represents an ACF 3-Bay Centerflow Hopper that the Reading & Northern Railroad converted to haul fine pulverized anthracite coal, used for agricultural purposes. For a full list of features, see page 27.

ATLAS O TURNTABLE

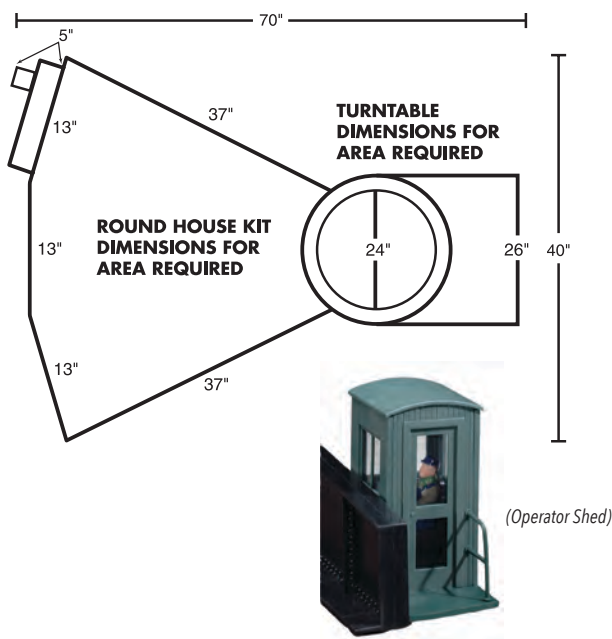

Product Info: <https://shop.atlasrr.com/p-53322-o-scale-turntable.aspx>

O TURNTABLE - In the steam era, many railroads used turntables to turn locomotives for their next journey. Railroads still use turntables to assist in the maintenance of diesel locomotives and rolling stock. Based on a Santa Fe prototype, Atlas O has realistically duplicated its above ground details, so adding a working turntable has never been simpler. What's more, everything is included for easy tabletop installation.

FEATURES:

- New - larger and more powerful motor
- New - flat cogged anti-slip belt
- New - deck support with more roller bearings for greater support of heavier locomotives
- New - redesigned metal contacts to power the rotating track
- Drive assembly is hidden under the utility shed
- Table diameter: 24"
- Proven Geneva-gearing for positive indexing
- Can be used for both 3 rail and 2 rail operation
- Will run on AC or DC power
- Compatible w/ TMCC & DCS (using TMCC or DCS accessory interface)
- Compatible with DCC (using a stationary decoder)
- Molded in appropriate colors
- Complete hook-up instructions
- Easy tabletop installation
- Motor Drive included in box for smooth and easy operation

ATLAS O TRACK & ACCESSORIES

Product Info: <https://shop.atlasrr.com>

Atlas is proud to offer a wide variety of track in both 2- and 3-Rail. Our track is time-tested and modeler approved and is crafted to be the MVP of your layout.

***Modeled for Realism:** The scale-sized plastic ties have a realistic wood grain, the tie plates have spikes, the rail joiners have authentic bolt detail and the center rail is blackened.*

***Versatility:** Every track piece has been specially engineered to fit precisely together in an infinite variety of combinations without the need for custom cutting and fitting.*

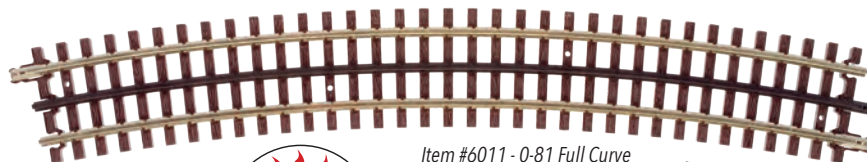

***Performance:** We chose a SOLID nickel silver T-rail for extra stability and superior electrical conductivity. In addition, the wide, flat surface of the rails provides far greater wheel/rail contact and better traction than tubular track. What's more, solid rails absorb sound better than tubular track so you can enjoy the sounds of your locomotive.*

3-RAIL FEATURES:

- SOLID nickel silver rail for realistic shape, sounds and rust prevention
- Super joiners for tight fit and superior electrical connection
- Large and growing list of track: 10 different diameters (O-27- O-108), 16 different switches, 6 crossings, all the straight pieces you could ever want, flex track and more!
- Geometrically exact layout construction
- UV compatible: great for both indoor and outdoor use

Item #6094 - Track Screws

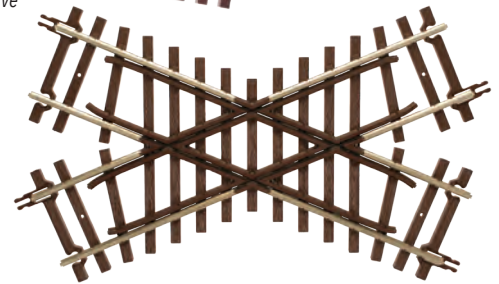

Item #6011 - 0-81 Full Curve

2-RAIL FEATURES:

- Code 148 Solid Nickel Silver Rail
- American prototype ties and tie spacing with correct spike, and tie plate and bolt details
- Dark brown tie strip
- Turnouts feature highly detailed metal insulated frogs and points
- Metal frog can be powered if desired
- UV compatible: great for both indoor and outdoor use

Atlas Keeps the Trains Rollin'

You built your layout with the best track around, Atlas' 21st Century Track System, now you'll want to run the best trains! Our locomotives and rolling stock don't just look fantastic, they run like a dream and the details & features are second to none. With several different lines to choose from, we have you covered no matter the era!

Master and Premier Line Locomotives & Rolling Stock

Atlas Master and Premier Line trains are top-of-the-line and feature the highest level of detail we offer. Each model comes ready-to-run, which means no assembly is required. Sometimes we include small detail parts for you to apply, just to add a finishing touch. All other details are molded directly onto the model in the correct places. Locomotives from these lines are noted for their reliability and smooth operation.

Trainman Line Locomotives & Rolling Stock

Atlas Trainman Line products use the same drive train and feature the same prototypical accuracy as our other lines, but the shells have less separate detail added, and are generally offered in fewer variations or phases for each model as compared to our Master and Premier lines.

Licensed, Limited Edition & Special Run Models

While Atlas takes great pride in prototypical accuracy, we also enjoy creating fun, commemorative paint schemes to help modelers celebrate the holidays. We also partner with multiple brands to offer licensed models such as our Premier 8,000 Gallon Beer Can Tank Cars decorated with - you guessed it - beer branded paint schemes! Still don't see what you've been dreaming of? Why not order it as a special run? Atlas offers the ability for customers to do custom runs on any model we currently make, provided you meet the minimum order quantities.

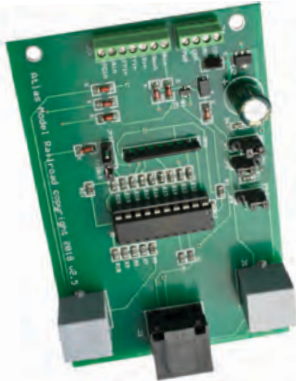

Visit www.atlasrr.com today for more information on track, locomotives, rolling stock, Special Runs & more!

**BUILT TO LAST.
SUPPORTED FOR THE LONG RUN.**

The Atlas Parts and Service Promise

Atlas products are built to last, and we stand behind them with service and ongoing parts support for both current and legacy models.

For decades, Atlas has designed model railroad products with long-term ownership in mind. That commitment extends beyond the initial purchase—supporting serviceability, repairs, and restoration through extensive replacement parts availability and ongoing customer support.

Whether maintaining a favorite locomotive or restoring a long-owned piece, Atlas is committed to keeping your railroad running.

Our Promise in Practice

- **Products designed for durability and serviceability**
- **Ongoing service and extensive replacement parts support**
 - **Support for both current and legacy Atlas models**
- **A long-standing commitment to customer continuity**
