PRE-ORDER ANNOUNCEMENTS - MAY 2021

GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY JUNE 23RD 2021

May 2021

Dear Fellow Model Railroaders,

Welcome to the May 2021 edition of the Atlas All Scale Monthly Catalog (ASMC). The ASMC is the basis of our guaranteed pre-order system. Before the go ahead is given to suppliers for final production, Atlas announces to its customers the products we are preparing to produce. This announcement comes in the form of the Monthly ASMCs, which gives customers the chance to place guaranteed pre-orders if placed by the given deadline. Atlas will try to fill orders placed after the deadline, but they will not be guaranteed. Occasionally, Atlas will speculate on order quantities to bring products to the market quicker. We will do our best to meet demand, however, in these instances allocations to dealers, distributors and their customers may be necessary.

The N Scale selection in the May ASMC includes the return of the Master SD50s and SD60s and the ever-popular Trainman Thrall 4750 Covered Hoppers. Atlas will also be announcing a new model in N Scale, the Master Line Cryogenic Reefers. HO Modelers will be happy to see a new run of the Master Line GP7s. Accompanying the GP7s will be the Master Coalveyor Bathtub Gondolas and the 53' Articulated Well Cars. Offered in both N and HO this month are the Master 5701 Covered Hoppers, 53' Containers and the 40' Refrigerated Containers. The ever-growing Atlas All Scales Signal System will also be adding an HO Modern Bi-Directional Signal to the lineup.

All these items can be found on our website, shop.atlasrr.com. While on the website, make sure to check out the 'New Arrivals' pages to see what has recently hit Atlas Dealers' shelves or the 'In-Stock' pages to see what is still hanging around the Atlas Warehouse. Need to do some track work? The new 148-page Atlas All Scales Track & Accessories Catalog will list everything you will need to expand your railroad. For assistance finding an Atlas Authorized Dealer near you, check out our Dealer locator at <https://shop.atlasrr.com/storelocator.aspx>.

Thank you for your interest and enthusiasm in these great products from Atlas Model Railroad Co.

Happy Model Railroading,

Drew Postle

Atlas Sales Manager

SD50

Denver, Rio Grande & Western

Southern Pacific - **WITH DITCH LIGHTS**

EMD introduced the SD-50 in the early 1980s with a 16 cylinder, 3500 h.p. engine to attain the power that they had early gotten from a 20 cylinder locomotive. The new, longer frame allowed the dynamic brake resistors to be relocated to a cooler area found between the central air intake and the cab.

The SD-60 varied little from its predecessor visually, the main changes taking place internally with the aging 645F engine being replaced by the 710G. The two locomotives can be distinguished by the door panels; the SD-50 features four latched doors in six door panels whereas the SD-60 has six latched doors in eight door panels.

The "wide nose" or "safety cab" was first offered as an option to US railroads in 1988. Union Pacific received the first units in early 1989. In 1991, the contour of the nose was changed slightly, going from a 3-piece to 2-piece windshield and tapering the sides of the nose to improve visibility for the crew. Burlington Northern was the first recipient of the revised model.

Features:

- Deck or pilot mounted ditch lights as appropriate per the prototype
- Directional lighting
- Separate plow and winterization hatch that can be installed by the modeler
- Blackened wheels
- Slower speed motor for closer to scale speeds
- AccuMate® magnetic knuckle couplers
- Golden-White LEDs

NEW ATLAS MODEL WITH UPGRADED TOOLING!

This new Atlas model features colorful paint schemes and represents a popular modern prototype. Cryogenic reefers have been used throughout the United States since the early 1990s to transport frozen food using cryogenic refrigeration technology.

Atlas' upgraded models will feature:

- Body mounted couplers
- Improved brake wheel
- Improved stirrups
- Improved crossover platform

TOTAL PIECES ORDERED			

The 5701 cubic foot covered hopper was introduced in the early Seventies for transporting bulk plastic pellets. Since 1972 ACF has built nearly 15,000 cars. Most of these were acquired by private companies including leasing companies, chemical companies, oil companies, and plastics companies.

The ACF 5701 grain hopper is similar to its 5701 plastics relative except it is equipped with continuous loading hatches and gravity outlets. The larger size was needed to transport lower density grain-related and similar agricultural products (e.g. feed, sunflower seeds etc) more efficiently than the then standard 4650, 4740, and 4750 cubic foot capacity grain hoppers. These were originally built as 263,000 GRL (Gross Rail Loading) cars but many have recently been rebuilt into the higher 286,000 GRL.

Features:

- Eight full-width panel body with nine weld seams
- Etched metal roof walks
- Ten 20" hatches (plastics hopper only)
- Longitudinal mounted air reservoir
- Pneumatic outlets (plastics hopper only)
- 100-Ton Roller Bearing Trucks
- Two continuous hatch designs (applied as appropriate on grain hoppers only)
- Gravity outlets (grain hopper only)
- AccuMate® couplers (AccuMate® couplers are made under license from AccuRail, Inc.)

TOTAL PIECES ORDERED			

Since the 1970s most international freight has been shipped by standardized 20- and 40-foot containers. Some of this huge flow of cargo between countries needs to be refrigerated for the transit. The second most common type of ISO* container in use is the refrigerated container. Today's refrigerated container design uses high tech composite (plastics and metals) construction and a "picture frame" type refrigeration unit. Atlas' model represents a standard 40-foot high-cube refrigerated container (ISO Type Code 45R1) found in many shipping and leasing fleets.

*ISO is the International Organization for Standardization.

Features:

- Prototypically accurate Daikin reefers
- 40-foot High-Cube Refrigerated Container
- Composite materials sandwich-sides design
- Detailed picture window refrigeration unit with separate parts
- ISO Type 45R1
- Five hinge / four bar doors with OUT style handles
- Each set comes as a 3-pack
- Compatible with Atlas N Master® 40' and 53' Well Cars

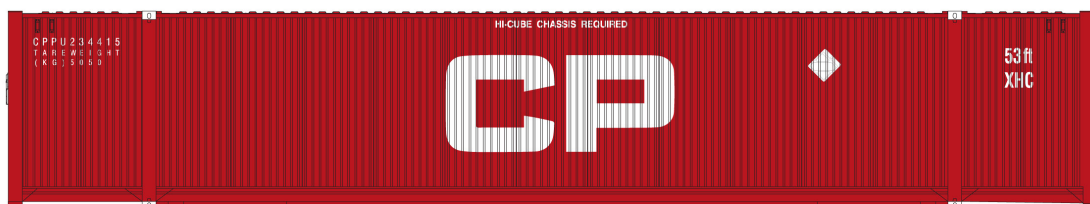

End view of a previous run model showing refrigeration unit

The Atlas 53' container is based off of a popular prototype. Introduced in 1989, the 53' style container has become a domestic standard in the shipping industry. With a larger capacity than 45' and 40' containers, it allows shippers to combine shipments into fewer containers.

Features: Side corrugations with an 8-55-8 arrangement, Front wall with 10 vertical corrugations, Roof with 6-54-6 corrugations, 1-3-1 beveled doors, Placard holders on front wall, sides and door, each set comes as a 3-pack. Compatible with the Atlas Master® N 53' Well Cars.

Reading

Introduced in 1949, the Electro-Motive 1500hp GP-7 combined the machinery of the F7 with a hood-type carbody that offered high visibility and easy engine access. The GP-7 was used in pulling every conceivable type of train and was sometimes substituted for part of a set of cab units.

Features:

- Die-cast tooling for frame/sill
- Optional 800 gallon or 1,600 gallon fuel tank
- Fine scale handrails and stanchions
- Golden-white LEDs
- Painted hand rails
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate[®] knuckle couplers
- Separately-applied wire grab irons
- MU hoses and coupler cut bars
- Two painted crew members
- NMRA 21 pin plug for DCC
- Maine Central features a short hood mounted bell per the prototype

Atlas Master[®] Series Silver Additional Features:
NMRA 21-pin plug for DCC (Decoder-ready)

Atlas Master Series Gold Features:

- ESU LokSound decoder, supporting all DCC programming modes.
- Flexible mapping of function keys F0 to F31.
- Follows all NMRA DCC standards and recommended practices.
- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor and more.

Built in the 1980's by ACF®, the Coalveyor Bathtub Gondola operated in unit train service to deliver coal to power plants. These cars were most often lettered for the utility companies that leased and purchased them. Many are still in service today. C&D cars were usually run in blocks of 4-12 cars. They were used for construction and demolition debris/refuse hauling.

Features:

- Die-cast chassis
- Ready-to-run
- Interior bracing
- Removable coal load
- AccuMate® couplers
- Brake detail
- 100-ton roller-bearing trucks
- Fine scale wheels
- Accurate painting and printing

AccuMate® couplers are made under license from AccuRail, Inc.

**NEW ROAD
NUMBERS**

Order Page: <https://shop.atlasrr.com/d-656-may-2021-n-scale-pre-orders.aspx>

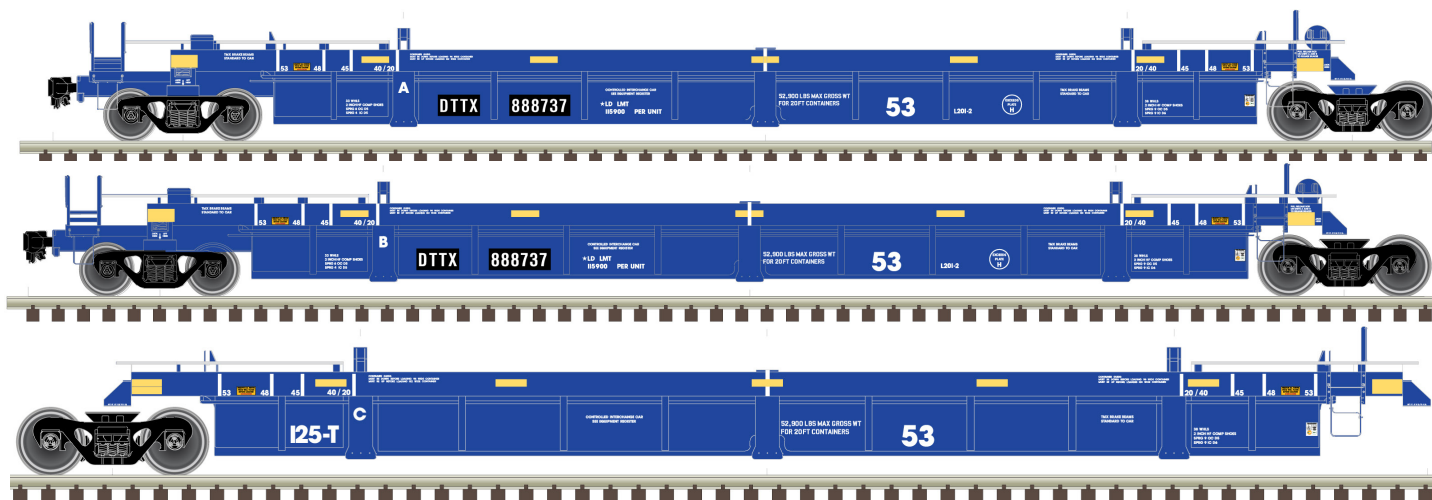

BNSF (SFLC)

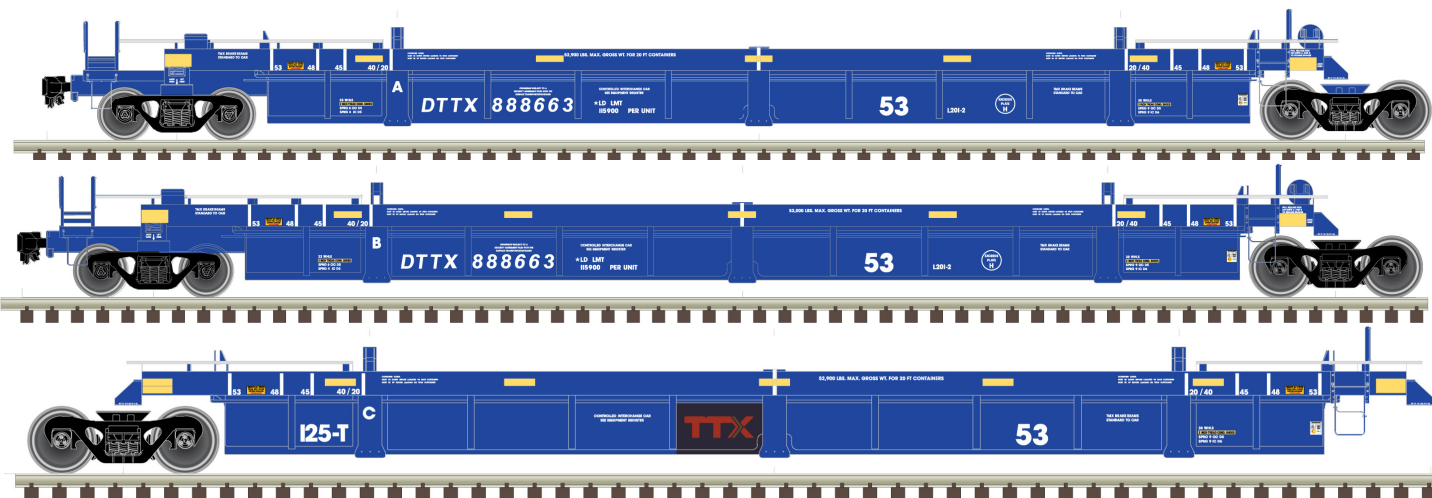

TTX

When the domestic intermodal container market settled out in the late 90's, the 53' long container emerged the winner. Car builders responded with new wells of like size to accommodate the new standard. Introduced in series service in early 2000, Thrall's triple 53' articulated well car was certainly the best looking of the 53' wells. Angular wheel cut-outs, three flared-bottom wide and eight narrow side posts give this intermodal age well car character.

TTX (xBRAN DTTX Patch)

TTX (xBRAN Forward Thinking Logo)

Features:

- Each car consists of three wells--A, B & C.
- Walkway variants specific to prototype
- Etched metal detailing
- Detailed air reservoirs
- Detailed brake valves
- Each item # contains one three car unit
- Sharp hand grabs and stirrups
- Runs on 18" radius
- Recommended for 22" radius
- Floor pin holes for Atlas and other brands of containers

TOTAL PIECES ORDERED			

The 5701 cubic foot covered hopper was introduced in the early Seventies for transporting bulk plastic pellets. Since 1972 ACF has built nearly 15,000 cars. Most of these were acquired by private companies including leasing companies, chemical companies, oil companies, and plastics companies.

The ACF 5701 grain hopper is similar to its 5701 plastics relative except it is equipped with continuous loading hatches and gravity outlets. The larger size was needed to transport lower density grain-related and similar agricultural products (e.g. feed, sunflower seeds etc) more efficiently than the then standard 4650, 4740, and 4750 cubic foot capacity grain hoppers. These were originally built as 263,000 GRL (Gross Rail Loading) cars but many have recently been rebuilt into the higher 286,000 GRL.

Features:

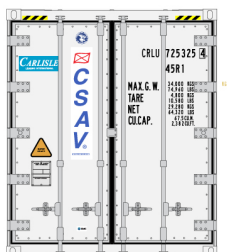

- Eight full-width panel body with nine weld seams
- Etched metal roof walks
- Ten 20" hatches
- Longitudinal mounted air reservoir
- Pneumatic outlets
- Blackened metal wheels
- Accurate painting and printing
- 100-ton roller-bearing trucks and body mounted AccuMate® couplers with screw-attached coupler pockets.

PERFECT FOR USE WITH OUR 53' WELL CARS FEATURED ON PAGES 28-31

Since the 1970s most international freight has been shipped by standardized 20- and 40-foot containers. Some of this huge flow of cargo between countries needs to be refrigerated for the transit. The second most common type of ISO* container in use is the refrigerated container. Today's refrigerated container design uses high tech composite (plastics and metals) construction and a "picture frame" type refrigeration unit. Atlas' model represents a standard 40-foot high-cube refrigerated container (ISO Type Code 45R1) found in many shipping and leasing fleets.

*ISO is the International Organization for Standardization.

Features:

- 40-foot High-Cube Refrigerated Container
- Composite materials sandwich-sides design
- Detailed picture window refrigeration unit with separate parts
- ISO Type 45R1
- Five hinge / four bar doors with OUT style handles
- Each set comes as a 3-pack

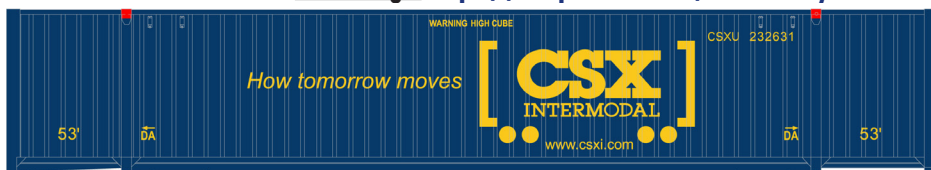

End view of a previous run model showing refrigeration unit

PERFECT FOR USE WITH OUR 53' WELL CARS FEATURED ON PAGES 28-31

The Atlas 53' container is based off of a popular prototype. Introduced in 1989, the 53' style container has become a domestic standard in the shipping industry. With a larger capacity than 45' and 40' containers, it allows shippers to combine shipments into fewer containers.

Features: Side corrugations with an 8-55-8 arrangement, Front wall with 10 vertical corrugations, Roof with 6-54-6 corrugations, 1-3-1 beveled doors, Placard holders on front wall, sides and door, each set comes as a 3-pack

ATLAS HO HOODED MODERN, BI-DIRECTIONAL SIGNAL

Order Page: <https://shop.atlasrr.com/d-656-may-2021-n-scale-pre-orders.aspx>

ESTIMATED ARRIVAL: 4th Quarter 2021 Arrival

ORDER IN PIECES	ITEM	DESCRIPTION	MSRP/ UNIT
		NEW!	
	70 000 146	HO Hooded Modern, Bi-Directional Signal	\$46.95
	TOTAL PIECES ORDERED		

The latest addition to the Atlas All-Scales Signal System line complements the current line of Modern Hooded signals by providing a signal mast configuration most commonly used by the prototype in situations where a section of track may be operated in both directions. Due to regulation changes in 1985, brought about by improvements in locomotive design and cab visibility, these bi-directional mast signals have been slowly replacing older above-track signal bridges in many places.

Features:

- Common signal and mast style currently in use across the US
- Three-color Safetrans hooded signal heads
- Finely detailed etched-metal platform and railings
- Integrated mini-plug connectors for seamless operation with the Atlas Universal Signal Control Boards and cables
- Common Anode wiring

	0501	HO Code 83 Flex Track (3' sections) 5-Pack	\$38.50
	TOTAL PIECES ORDERED		

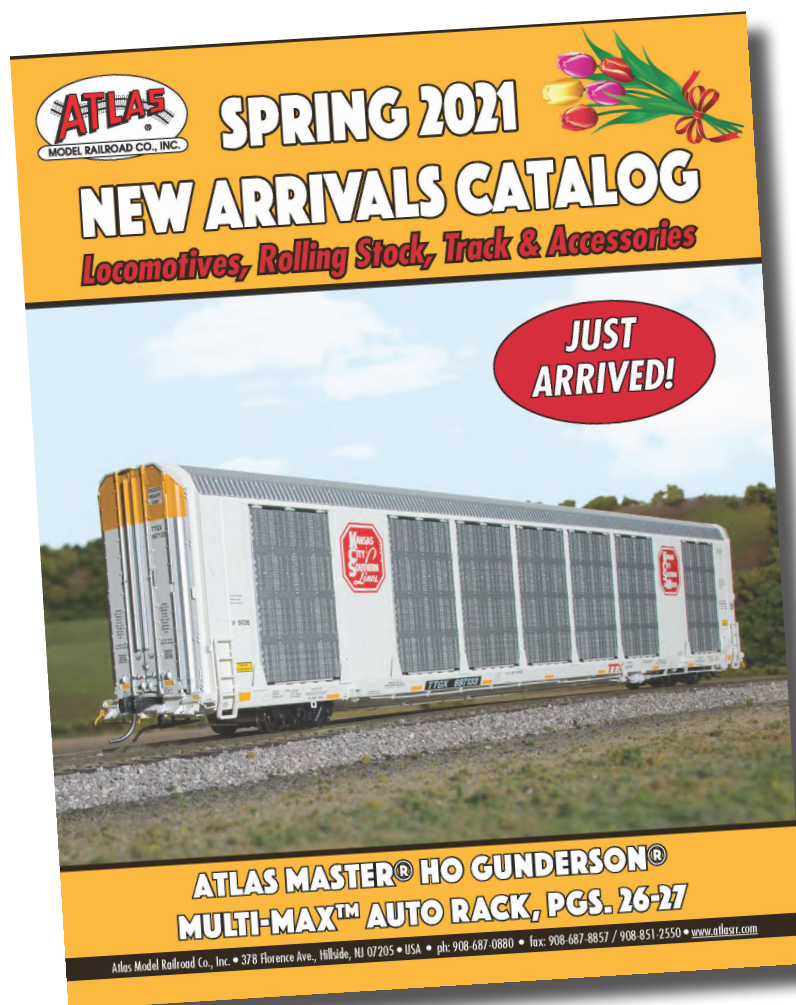

Atlas' popular Code 83 Flex-Track is now being offered in a convenient 5-pack!
Easy to install, Super-Flex Track® enhances the realism of your layout. Unlike other flexible track which can become inflexible and kink, Atlas' Super-Flex Track® can be formed and re-formed with ease to achieve the desired shape. This unique track can be shaped to form curves of any radius, is ideal for spiral easement curves and is easily manipulated to help you make your layout vision a reality.
