PRE-ORDER ANNOUNCEMENTS - SUMMER 2025

PRE-ORDER DUE DATE: WEDNESDAY AUGUST 27TH 2025

July 2025

Dear Model Railroader,

Welcome to the Atlas Summer 2025 HO & N Scale Catalog. We're proud to bring you all new announcements from our Master and Trainman lines. We hope that whether you are a dedicated Atlas follower or a new fan, that you continue to make us a part of the tradition of fantastic model railroading!

The ASMC is the basis of the distinctive Atlas Pre-Order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange pre-orders for their preferred products.

The Summer 2025 edition of our catalog includes announcements of prototypical N and HO locomotives including the N GP38-2 along with the brand new HO CF-7 and N & HO U23B Locomotives. We're also announcing plenty of prototype accurate rolling stock including N & HO scale Pressureaide Hoppers, Extended & Standard Vision Cabooses, all new N 53' Modern Reefer Trailers and more. Don't miss out on our Limited Edition Collectors Series offerings featured on pages 24-25 and 54-55!

While on the Atlas website, shop.atlasrr.com, be sure to peruse the "New Arrivals" pages to see what has recently arrived on Authorized Dealer shelves, or the In-Stock pages to see what is readily available from Atlas. Need to do some track work? Atlas has all the pieces you need - from straights to switches and everything in between! Atlas can also help outfit you with a full layout package - check out shop.atlasrr.com for more information. We also offer a full line of instructional guides if you're looking to start fresh with a brand new layout! For a complete listing of our books, visit our website or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, use our handy Dealer locator at: <https://shop.atlasrr.com/storelocator.aspx>.

Don't miss out on all of the latest Atlas news, announcements, special offers and more. You can ensure that you receive the latest Atlas news delivered to your inbox by visiting shop.atlasrr.com and signing up for our email newsletter - the Atlas Insider .

Thank you for your interest and enthusiasm in the exceptional multi-scale product offerings produced by Atlas Model Railroad Company.

Happy Modeling,
Ross Medine, Sales Manager

Atlas would like to thank the New York Central Historical Society for providing access to archival reference materials for the N 40' PS-1 Box Car and HO Heavyweight Coach models.

Atlas Catalog-Tariff Based Pricing Notice - The prices shown in this catalog are based on the current U.S. tariff rate of 30% on imports from China. Should this rate change prior to product arrival, final pricing may be adjusted—either upward or downward—based on the tariff rate in effect at the time of importation. Atlas understands that evolving tariffs affect every part of the supply chain—from production and logistics to wholesale and retail pricing. We are committed to minimizing those effects whenever possible, including absorbing increased costs where feasible to support long-term relationships and preserve market stability. We encourage all customers—dealers, distributors, and consumers—to continue placing orders and pre-orders knowing that Atlas is actively managing the impact of tariff changes. For updates on trade policy and industry advocacy, visit the Hobby Industry Coalition at hobbycoalition.org, an initiative proudly supported by Atlas.

To Order, Please Contact Your Authorized Atlas Dealer

All prices are in US dollars. Prices and dates are subject to change without notice. Atlas reserves the right to correct errors, change prices and modify designs without notice.

Any product pricing errors and updates may be corrected at any time through notification of distributors, dealers and consumers on our website: shop.atlasrr.com.

The Dash 2 locomotive series, unveiled by EMD in 1972, featured significant changes, such as a solid-state, modular electrical control system and improved engine components designed to increase traction and reduce exhaust emissions. A reliable work-horse, the GP38-2 remains one of the most successful locomotives ever built. Most are still in service today.

Features:

- Now with ditch lights
- Golden-white LEDs
- With ditchlights
- Painted safety rails
- Directional lighting
- Blackened metal wheels
- Scale Speed™ motor
- Factory-installed AccuMate® magnetic knuckle couplers
- Separately-applied coupler cut levers
- Atlas Master® Gold version features ESU LokSound Decoder

Powered by a V12 FDL prime mover, the 2250 h.p. U23B was GE's intermediate-sized four-axle road-switcher of the late 1960s through the mid 1970s. The U23B's direct competitor during this period was the very successful EMD GP38. In 10 years of production, from 1968 through 1977, a total of 481 units were produced, making this the second best seller of GE's "Universal Series" locomotives. The first units were delivered to the Delaware & Hudson in August and September 1968. CSX predecessors Chesapeake & Ohio and Louisville & Nashville had a combined fleet of 120 units, giving CSX one of the larger active fleets in later years. Penn Central, Santa Fe and Missouri Pacific also purchased sizeable fleets of U23Bs.

Features:

- Operational low nose headlight (used where appropriate)
- Both DCC ready and ESU DCC Sound equipped versions
- Separate coupler cut lever
- Cab with 4 or 2 side windows (as appropriate per road name)
- Directional lighting
- Golden white LEDs
- Painted safety rails
- Blackened metal wheels
- Dual flywheel equipped 5-pole skewed armature motor with a low friction mechanism
- Factory-installed AccuMate® magnetic knuckle couplers!

Check out our limited edition 5 Unit Spine Car offerings on page 24!

Spine cars are one of the most recognizable freight cars on the rails today. Named after their simple, spine-like appearance, these versatile cars carry anything from highway trailers, to international, corrugated containers. These Atlas N scale Trinity 53' Spine Cars are available in either five-car (RAF53C) or three-car (RAF33) sets. The RAF53C class was built in late 1997 by Trinity Rail for TTX, these 5-Unit Spine Cars feature TTAX reporting marks. While very similar to other 53' Trinity Spine Cars, the "RAF53C" class boasts nearly 250, 5-car sets on the TTX roster. The RAF33 class are made up of three spine cars only, unlike their bigger brother the (RAF53C) 5-car sets. Although very similar to the (RAF53C) sets in all other specifications.

Features:

- Ready-To-Run
- Die-Cast Metal & Plastic
- Fine-Scale Detail All Around
- Chemically Etched Walkways
- Accurately Painted/Printed
- Prototypical Ride Height
- Assembled Collapsed or Raised Hitches
- BLMA 70-Ton ASF Ride Control Trucks
- BLMA Scale Profile Metal Wheels
- Body-Mounted Micro-Trains Compatible Knuckle Coupler
- Perfect for the Atlas 40' 45' and 53' containers.

The Atlas 53' Trinity 3- & 5-unit spine car sets are the perfect match for our Master N 53' Modern Reefer Trailer on pages 22-23.

The 40' Boxcar is widely known as one of the most popular freight cars used by railroads as they transitioned from steam to diesel. In particular the Pullman Standard or PS-1 design was one of the most popular and was widely used by North American railroads. These boxcars were built beginning in 1947 and share the same basic design, with certain elements such as door size, door style or roof type varying among the different railroads and production years. When production of these cars ceased in 1963, over 100,000 had been produced.

This run of the N scale PS-1 features 8' door openings which enabled larger bulk freight and merchandise to be loaded and unloaded more efficiently. Most roads fielded large quantities of these cars (C&E for example had about 400 on the roster from one 1959 order alone!) and some would order separate groups of cars dedicated to specialty service (such as the 25 cars of lot 848-B produced for New York Central Pacemaker Service). Other roads would update these cars in-house, such as the Seaboard Air Line which added roof insulation and repainted several groups of cars with a heat-reflective silver paint scheme (advertising one of their named passenger trains) specifically to carry beer shipments. This versatile box car could be found across the country in many types of service over their long lifetimes.

Features:

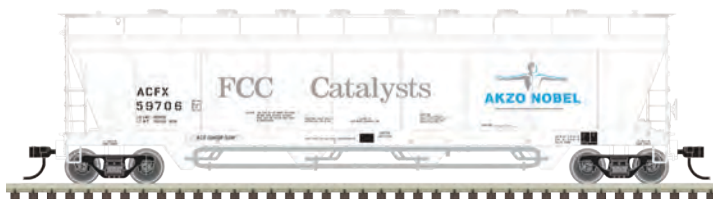

- Body Mounted Accumate Couplers
- Barber S-2A 50-ton Trucks with Metal Wheels
- Separately Applied Ladders
- Etched Metal Roof Walk
- 10' or 12' Stiffener Roof per prototype
- Ajax and Miner Brake Wheels

A part of ACF's Centerflow line, the 5,000 cubic foot Pressureaide hopper was designed to handle dry, powdered commodities like flour, or talcum powder. Due to its similarity to ACF's popular 4650 cubic foot Centerflow hopper, the Pressureaide hopper benefit from the 4650's similar design, with one major difference being various pipes running underneath the car. 15psi is applied to the inside of the piping to help with unloading. These cars debuted in the late 1970s and were built until the 1990s and paved the way for more pressure-assisted hopper cars. Pressureaide hopper cars ended up phasing out its predecessor, the Airslide hopper car. Due to the success of these cars, they are still commonly seen in service in the modern day.

Features:

- Etched metal roof walks
- Detailed brake gear with scale piping
- AccuMate® couplers
- Accurate painting and printing
- 100-ton roller-bearing trucks

AccuMate® couplers are made under license from AccuRail, Inc.

Norfolk Southern

Belvidere & Delaware

Based on prototypes that were built during the 1960s, these cabooses were popular on railroads from coast-to-coast. With the advancement of the End-of-Train device, cabooses slowly began to fall out of favor. However, in the early 2000's, "shoving platforms" began to appear as a place to safely house a crew when a reverse move was required. Instead of riding on the side of a freight car, the crew member now has a safe place to stand, while guiding the rear of a reverse move. Atlas' shoving platform cabooses will feature blanked out windows (Where appropriate).

Features:

- Thin endrails
- Window glazing
- Separate brake cylinder
- Open smoke stack
- Triple valve and air reservoir
- Roller-bearing caboose trucks
- Roofwalk where appropriate
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc.

In the late 1930's, the 50' boxcar started to become the choice car to ship various goods with compared to the iconic 40' boxcar. With the advent of additional space, larger, bulkier items such as automobiles and furniture were able to be shipped in 50' boxcars. Many 50' boxcars were placed in special service to haul only those commodities. Because of the double doors, it was a lot easier to load and unload big, bulky items from these cars.

Features:

- Correct fishbelly design side sills
- Prototypical paint schemes
- Diagonal panel roof
- Improved Dreadnaught ends
- Friction bearing trucks w/ Accumate® couplers
- Weighted, detailed underframes
- True scale dimensions with accurate details
- Colorful painting and printing
- Equipped with AccuMate® operating knuckle couplers

Trailer on flat car service has existed since the 1940s as a part of North American railroading. Although intermodal trailer traffic would explode in the late 1980s and early 1990s with railroads perfecting hotshot intermodal freight operations. The primary commodity of early intermodal trailers was mail and dry non-perishable goods. Advancements in refrigeration units in the late 1990s would allow refrigerated trailers with food, pharmaceuticals and other perishable goods to join the list of commodities traveling via intermodal freight service. The Atlas 53' Modern Reefer Trailer is a replica of the extremely popular Utility 3000R refrigerated trailer prototype. The 3000R has been the most widely produced 53' refrigerated trailer since its introduction in 1999. 3000R trailers can be seen on almost all intermodal trailer trains from 1999 onwards, making it a critical model for modern intermodal modeling!

The Atlas 53' Modern Reefer Trailer is a perfect match for our Master N 53' Trinity 3- & 5-unit spine car sets on pages 12-13.

Features:

- Fully assembled
- 3 distinctive refrigeration units (Early Carrier, Late Carrier and Thermo King)
- 2 distinctive end doors (Standard Door, Quilted Barrier Door)
- Separately applied mud flaps, fuel tank
- Separately applied tire rack, wind skirt (as appropriate per road name)

TOTAL PIECES ORDERED					

The Santa Fe CF7 locomotive is a diesel-electric engine originally built by General Motors Electro-Motive Division (EMD) as an F7 and later rebuilt into a CF7 by the Atchison, Topeka & Santa Fe Railway. The CF7s were converted from F7 units between 1970 and 1978 to meet the need for more versatile road switchers. These locomotives had their streamlined car bodies replaced with custom-made, general-purpose bodies, making them suitable for switching duties. A total of 233 units were rebuilt, and they were used extensively across the Santa Fe system for various tasks, including switching cars, transporting local freight, and hauling mainline trains. The CF7s became popular on regional railroads, short lines and as grain belt facility switchers after being sold in the 1980s, and some remain in operation today.

Features:

- All new tooling.
- Several cab and body variations to accurately match the prototype:
 - (5) Cab variations include both rounded and angled roof styles and several different window arrangements
 - (2) Body shell variations (2 and 4 port exhaust stacks)
- Road name specific details such as roof mounted antenna plane, horn type and placement, AC units, truck types, cab variations, handrail variations, long hood grill variations and more!
- Solid or chain equipped end railings where appropriate
- Separately applied detail parts such as grab irons, horns and antennas
- Etched metal windshield wipers
- Accurate Painting and Printing
- New! Factory equipped with metal knuckle couplers for better durability
- DC and DCC/Sound versions available.
- Coupler cut levers, Trainline air hoses, MU Hoses
- Accurate Blomberg B Truck Sideframes
- All Wheel Pickup for smooth operation
- Illuminated directional LED headlight and number boards

Atlas Master® Series Silver Additional Features:

- NMRA 21-pin plug for DCC.

Silver Sound Ready™

Wired speaker and enclosure included
for easy conversion to sound.

Features continued:

Five pole skewed armature motor with dual flywheels for optimum performance at all speeds

- (2) truck variations - Blomberg and Blomberg Modified without external brake shoes
- NMRA compliant RP-25 blackened metal wheels
- Realistic die-cast underframe
- See through fans with separate fan blades

Gold models are equipped with ESU LokSound.

ESU Loksound Functionality Features:

- ESU LokSound decoder, supporting all DCC programming modes.
- Flexible mapping of function keys F0 to F31.
- Follows all NMRA DCC standards and recommended practices.
- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor and more

The 3,600 horsepower MPI (Motive Power Industries) MP-36 locomotive is one type in a series of passenger locomotives produced in the company's MPXpress lineup. While there have been numerous variations produced, this new Atlas model represents the most common, the MP36PH-3C. This variation includes a separately powered Head-end Power (HEP) system which alleviates the need for high prime mover RPM to power the passenger cars' lighting and electrical systems.

Features Include:

- Golden-white LEDs
- Realistic die-cast underframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Realistic lighting effects including ditch lights and in-cab light
- Metal knuckle couplers
- Detailed cab interior
- Separately-installed scale windshield wipers, metal grab irons and fine scale handrails
- Coupler cut levers
- Multiple unit hoses and trainline hoses
- Recommended 22" radius with Atlas passenger cars
- Silver Sound Ready

Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder.

Silver Sound Ready™

Wired speaker and enclosure included
for easy conversion to sound.

TOTAL PIECES ORDERED					

Powered by a V12 FDL prime mover, the 2250 h.p. U23B was GE's intermediate-sized four-axle road-switcher of the late 1960s through the mid 1970s. The U23B's direct competitor during this period was the very successful EMD GP38. In 10 years of production from 1968 through 1977 a total of 481 units were produced, making this the second best seller of GE's "Universal Series" locomotives. The first units were delivered to the Delaware & Hudson in August and September 1968. CSX predecessors Chesapeake & Ohio and Louisville & Nashville had a combined fleet of 120 units, giving CSX one of the larger active fleets in later years. Penn Central, Santa Fe and Missouri Pacific also purchased sizeable fleets of U23Bs.

Primary spotting features include a stepped-out radiator section and two sets of three tall engine access doors near the center of the long hood. During production, the U23B was equipped with various truck side frames, including Blomberg trucks from EMD trade-in locomotives, AAR-style trucks, or GE's own four-axle "FB2" truck. One of these three truck styles is included on our model where appropriate per road name.

Today the number of active U23B's has dwindled, but a handful can still be found working for short lines and regional railroads in North America.

Features:

- Snow plow (included when appropriate per road name)
- Separately-applied scale detail parts include: windshield wipers, metal grab irons, coupler cut levers, multiple-unit hoses, train line hoses, fine scale handrails, drop steps and more!
- Five pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting with Golden-white LEDs
- Blackened metal wheels
- Metal couplers
- Ditch lights
- Etched metal windshield wipers

Atlas Master™ Series Silver Additional Features:

- NMRA 8-pin plug for DCC (Decoder-ready)

Metra Operation North Pole 2016 Type 6000 Trailer #6050

Metra Operation North Pole 2016 Type 6000 Trailer #6158

Metra Metra Operation North Pole 2016 Type 8500 Cab Car

Built specifically for Metra by the Japanese rail car builder Nippon Sharyo, the TYPE 8500 Cab Car and TYPE 6000 Trailers were designed with additional safety features, comfort, and accessibility in mind to help modernize Metra's aging commuter car fleet. Metra took delivery of the TYPE 8500 and 6000 from 2002 to 2008. Metra has 200 of each the TYPE 8500 and TYPE 6000 in its fleet. Cal Train and Virginia Railway Express also ordered variations of the TYPE 8500 and 6000 after seeing its success with Metra. These modern Bi-Levels are a staple of Chicago railroading and will continue to haul commuters to their destinations around Chicago for years to come.

Check out our limited edition offerings of this model on page 55!

"Metra" and "Metra Metropolitan Rail" are registered servicemarks of Metra.

From short commuter runs and locals to long-distance and special name trains, the humble Coach car has served as the foundation of the passenger train from the beginning of the railroads. Coaches can be found in many different sizes and styles, depending on desired passenger capacity, anticipated service class, and amenities (such as including semi-reclining seats or providing dedicated smoking areas) with the final configuration based on the ever-changing needs of an individual railroad. As a result, many minor variations of what might be considered a "standard" car could be found from a number of builders such as Pullman, Standard Steel, American Car and Foundry, Barney and Smith, Jackson and Sharp, etc.

In the Heavyweight era, two of the most common arrangements for coach cars were the single and paired window configurations. The Atlas single window design is based on prototypes built for the New York Central System, and the paired window design on Chesapeake and Ohio prototypes, although a large number of railroads designed and took delivery of nearly identical cars. Over time, many cars were "modernized" in appearance and function to run with the new streamlined trains or were modified and re-assigned to local and eventually commuter service. Cars underwent several design cycles, such as converting clerestory roofs to those with smoother lines, adding air conditioning, installing sealed windows, new trucks, and making interior changes. As a result, many of the heavyweight coach cars built at the turn of the 20th century served long lifetimes and were still running in commute service through the late 1980s-90s.

The Atlas Single and Paired Window Coaches are now available in a number of different era-appropriate configurations and paint schemes, and feature:

- Full interior detailing
- Scale operating diaphragms
- Full, separately-applied underbody detail (brake piping, steam traps, brake rigging, etc.)
- Scale window glass
- Detailed trucks with free-rolling metal wheels
- Recommended 24" Radius Minimum

A part of ACF's Centerflow line, the 5,000 cubic foot Pressureaide hopper was designed to handle dry, powdered commodities like flour. Due to its similarity to ACF's popular 4650 cubic foot Centerflow hopper, the Pressureaide hopper benefit from the 4650's similar design, with one major difference being various pipes running underneath the car. 15psi is applied to the inside of the piping to help with unloading. These cars debuted in the late 1970s and were built until the 1990s and paved the way for more pressure-assisted hopper cars. These cars are still commonly seen in service in the modern day.

Features:

- Etched metal roof walks
 - Detailed brake gear with scale piping
 - Blackened metal wheels
 - Accurate painting and printing
 - 100-ton roller-bearing trucks and body mounted AccuMate® couplers with screw-attached coupler pockets
- AccuMate® couplers are made under license from AccuRail, Inc.

Norfolk Southern

Belvidere & Delaware

Based on prototypes that were built during the 1960s, these cabooses were popular on railroads from coast-to-coast. With the advancement of the End-of-Train device, cabooses slowly began to fall out of favor. However, in the early 2000's, "shoving platforms" began to appear as a place to safely house a crew when a reverse move was required. Instead of riding on the side of a freight car, the crew member now has a safe place to stand, while guiding the rear of a reverse move. Atlas' shoving platform cabooses will feature blanked out windows (Where appropriate).

Features:

- Thin endrails
- Window glazing
- Separate brake cylinder
- Open smoke stack
- Triple valve and air reservoir
- Roller-bearing caboose trucks
- Roofwalk where appropriate
- Accurate painting and lettering

AccuMate® couplers are made under license from AccuRail, Inc.

The Atlas HO Super Duty F Series pickup trucks reflect the design styling and options available in the second generation (2008-2010) of these popular trucks. Along with the variety of configuration options available in the prior generation F-250 and F-350, Ford introduced the F-450 with a regular production pickup bed for the first time as a base crew cab with dual rear wheels powered by a Power Stroke 350 HP V8 diesel engine. These three classes of pickups were offered in several trim levels and were found in all types of service from basic family transport to contractor work trucks and police and fire duty.

The versatile design of the Ford F series pickups enabled a wide variety of specialized arrangements, with single-cab, extended-cab and crew-cabs coupled with different bed lengths and types. Utility backs consisting of built-in storage units and trade-specific equipment were available from aftermarket suppliers such as Knapheide and Reading, and the railroads were quick to also add Hi-Rail gear for use by their track gangs, signal crews and inspectors.

Features:

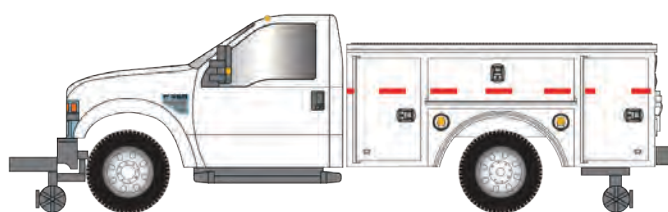

- Officially Licensed
- Prototypical Trim Packages (XL, XLT, 4x4)
- Accurate design and detailing
- Optional lightbars, caps, etc.

Ford Trademarks and Trade Dress used under license to Atlas Model Railroad Co., Inc.

Put Your Trains on the Right Track!

With time tested, modeler approved Atlas HO & N scale track!

Whether you're finishing an existing layout, starting a new one, or just giving that trainset loop some extra pieces, Atlas has the 'right track' for you. The rugged plastic construction, nickel silver rail and U.S. prototype detail, assures longevity, maximum conductivity and accurate realism that guarantees your trains look good and keep running smoothly. Atlas track provides industry leading **quality** at unequalled **value**, and our **selection** is so large we have an entire catalog devoted to it. HO and N scale track, in a variety of rail sizes, is fully stocked and ready to ship to you and your favorite Atlas authorized dealer now. For more information, and the dealer nearest you, visit shop.atlasrr.com and request a catalog of your own. And remember...*You're on the right track...with Atlas!*

HO SCALE TRACK

HO True-Track®

Atlas HO True-Track® has true-to-life gray gravelled roadbed, correctly angled roadbed shoulders and features Atlas Code 83 Snap-Track®.

HO Code 83

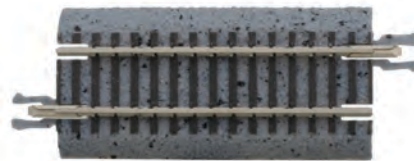

Atlas HO Code 83 track features prototypically-fine brown ties and nickel silver rail, and not only looks realistic but is incredibly reliable.

HO Code 100

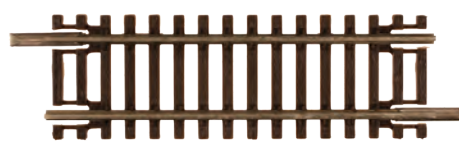

Atlas HO Code 100 track features black injection molded plastic ties and solid nickel silver rail, and is suitable for all skill levels.

N SCALE TRACK

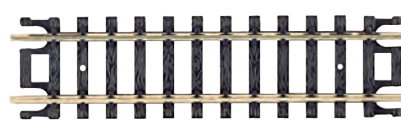

N True-Track®

Atlas N True-Track® features Code 65 rail & dark brown ties with prototypical spacing and is now improved with true-to-life gray gravelled roadbed making it even more realistic!

N Code 55

Atlas N Code 55 track features simulated wood brown ties and smaller nickel silver rail, and is praised for its superior design and ease of use.

N Code 80

Atlas N Code 80 track features black ties and nickel silver rail, and is built to last for ultimate performance.

ATLAS SUPER-FLEX® TRACK

- Item #168 HO Code 100 Super Flex Track
- Item #500 HO Code 83 Super Flex Track
- Item #2000 N Code 55 Super Flex Track
- Item #2500 N Code 80 Super Flex Track

Invented and patented by Atlas founder Stephen J. Schaffan Jr., this innovative, finely engineered precision track is the first choice of experts who demand the best. Easy to install, Super-Flex Track® enhances the realism of your layout. Unlike other flexible track which can become inflexible and kink, Atlas' Super-Flex Track® can be formed and re-formed with ease to achieve the desired shape. This unique track can be shaped to form curves of any radius, is ideal for spiral easement curves and is easily manipulated to help you make your layout vision a reality.

**ATLAS
SUPER-FLEX® TRACK**
the original and still the best.

ACCEPT NO IMITATORS.

ATLAS MODEL RAILROAD CO., INC. • 378 Florence Ave., Hillside, NJ 07205 • shop.atlasrr.com

No Matter the Scale, No Matter the Size Atlas Has the Layout For You!

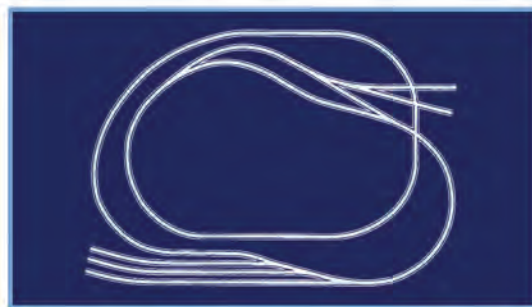

N TRUE-TRACK: NTT-6 PORT READING TERMINAL

From web site: www.atlasrr.com **Minimum Table Size Required:** 3' x 6'

Products Required: Straight sections, radius sections, turnouts, a crossing, bumpers, insulated joiners, terminal joiners and a selector

The Port Reading Terminal is a figure eight in disguise. This 66" X 32" layout incl. a mainline run as well as a small yard and three industrial sidings with room to expand. This layout is designed with two operators in mind. One can be switching the yard located at the front of the layout while the other can run mainline freights, allowing for continuous mainline running with no waiting.

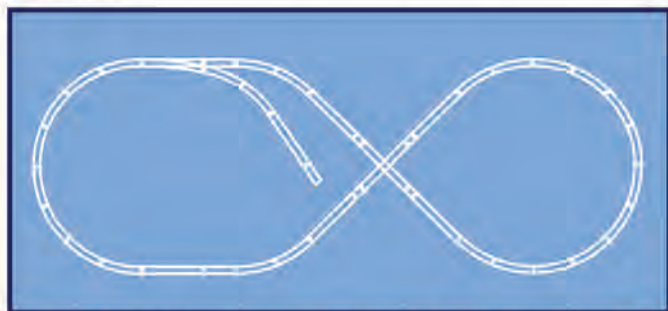

N CODE 80: N-7 TWICE AROUND VIA "UP & OVER"

From Book #6: *Introduction to N Scale Model Railroad*

Minimum Table Size Required: 32" x 45"

Products Required: Straight sections, radius sections, turnouts, a crossing, bumpers, insulated joiners and terminal joiners, necessary electrical components

If you enjoy watching a long train work its way up and down the grades of a long winding main line, the N7 is the layout for you. On this layout, yard tracks are available for breaking up and storing long trains, and a passing track with two industry spurs is available to provide additional operating diversions.

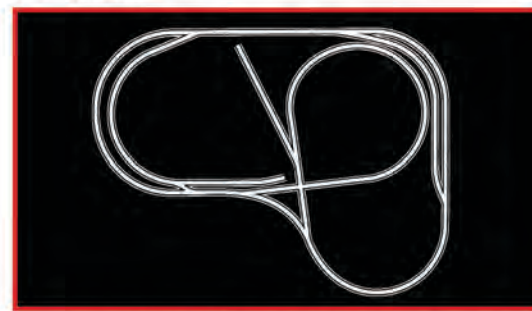

N SCALE CODE 55: N-504 PLATTSBURG PRETZEL

From web site: www.atlasrr.com **Minimum Table Size Required:** 2' x 5'

Products Required: Straight & radius sections, turnouts, a crossing, terminal joiners, bumper and a selector

Take an ordinary oval track, twist one end and you have one of the most popular track plan elements: the Figure 8. The Plattsburg Pretzel is a Figure 8, keeping operation interesting by making the train appear to reverse its direction as it proceeds. This layout also adds interest by adding a spur for more train enjoyment.

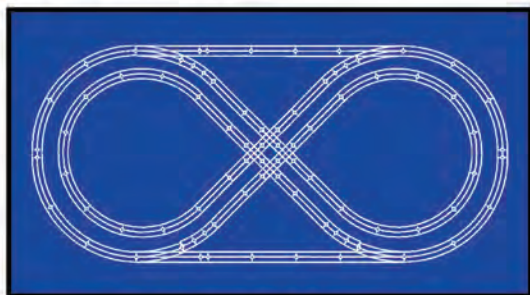

HO CODE 83/100: HO-7 THE JUNIOR PRETZEL

From Book #9: *Beginner's Guide to HO Model Railroad*

Minimum Table Size Required: 6' x 8'

Products Required: Straight sections, radius sections, Snap-Switches, rerailers, terminal sections, a crossing, bumpers, rail joiners and the necessary electrical components

Since it is built on an extended platform, there are many possibilities with the HO-7; such as longer runs, longer trains and more realistic operations.

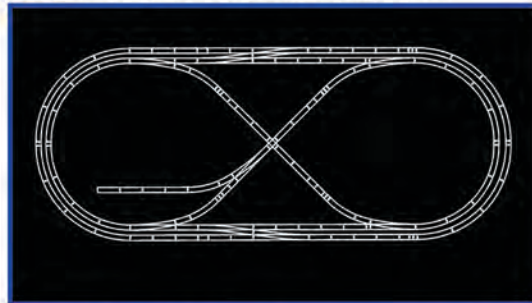

O 3-RAIL: O-22 JANESVILLE JUNCTION

From Book: *Atlas O 3-Rail Layout Book*

Minimum Table Size Required: 5' x 10'

Products Required: 68 pieces of sectional track, 4 remote switches, 4 crossings, and the necessary electrical components, rail joiners, track screws and layout wire.

This layout connects two figure eights with a quadruple crossing so trains can travel in multiple directions. A simple, yet interesting layout, this track plan is great for the modeler who loves to see trains run.

O 2-RAIL: O-203 RARITAN & SOUTH SHORE

Minimum Table Size Required: 8' x 18'

Products Required: 112 pieces of sectional track, 9 turnouts, 1 crossing and the necessary electrical components, rail joiners and layout wire.

The Raritan & South Shore expands Layout O-202 to two ovals with a fully-interconnected figure eight. Trains can travel anywhere on the layout and Atlas O electrical components make wiring this layout a cinch!
