100 YEARS OF ATLAS HISTORY

Atlas Tool Company was founded by Stephan Schaffan Sr. in 1924 as a general machine shop in a small garage at 330 Waverly Avenue in Newark, New Jersey. His son, Stephan Schaffan Jr. joined him in the business in 1933. As a frequent visitor to the local hobby shop, he would often ask the owner if there was anything he could do to earn some extra spending money. Tired of listening to his requests, the hobby-store owner threw some model railroad track parts his way and said, "Here, see if you can improve on this".

In those days, railroad modelers had to assemble and build everything from scratch. Steve Jr. created a "switch kit" which sold so well, that the entire family worked on them in the basement at night, while doing business as usual in the machine shop during the day.

Not long after, Steve Jr.'s accomplishments include engineering the stapling of rail to fiber track, inventing the first practical rail joiner and pre-assembled turnouts and flexible track—all of which helped to popularize model railroading and assisted in the creation of a mass-market hobby. As the business grew, their manufacturing needs went beyond what the small garage could provide, so in 1947 Steve and his father had the first factory built in Hillside, New Jersey at 413 Florence Avenue. On September 30th, 1949, Atlas Tool Company Inc. was officially incorporated as a New Jersey company.

Over time Atlas, has expanded their product line to include much more than just track. At your local hobby store you can pick up Atlas track, locomotives, freight cars, signals, lighting and more in HO, N, O and even Z scale.

To mark the 100th anniversary of Atlas, we are offering ALP-45DP locomotives and Bombardier passenger car models decorated in special 100th anniversary paint schemes that celebrate our long history. What makes it even more memorable is that residents and visitors in the New Jersey area can now see an actual locomotive wearing the Atlas 100 anniversary scheme thanks to our partnership with NJ TRANSIT. NJ TRANSIT #4503 has been wrapped with our commemorative 100 anniversary artwork, and is now in service on select NJ Transit routes.

Modelers won't just be buying a unique piece of Atlas history, but a prototypical replica of the actual locomotive. While there are no plans for the passenger cars to be replicated in this manner, these colorful model paint schemes are the perfect matching complement to the locomotive. Together they will create a fantastic looking train that will look terrific operating around your layout or, as a once in a lifetime collectible, displayed upon your shelf.

ATLAS ARCHIVAL PHOTOGRAPHS

Stephan J. Schaffan Sr., shortly after immigrating from Czechoslovakia in the early 1900's, working on a rail crew on the East coast.

ATLAS HO & N MODERN COMMUTER TRAINS

Product Info: <http://shop.atlasrr.com/d-707-ho-n-modern-commuter-cars.aspx>

ATLAS MASTER® HO & N ALP-45DP LOCOMOTIVE - 100th ANNIVERSARY

The ALP-45DP is a “dual mode” locomotive, capable of drawing power from either overhead electrical wires or its own pair of 12-cylinder Caterpillar diesel engines. These flexible locomotives were designed to provide a one-seat commute from NJ TRANSIT’s various diesel-only lines into the electrified territory that leads to New York City’s Penn Station. This fulfills the requirement of not operating diesels through the North River Tunnels and within the subterranean Penn Station complex. Produced by Bombardier Transportation in Kassel, Germany, the first ALP-45DP locomotive entered service on NJ TRANSIT on May 30, 2012.

To celebrate the 100th anniversary of Atlas, we are offering this anniversary edition ALP-45DP #4503 with special artwork to commemorate this momentous occasion.

Products bearing NJ TRANSIT marks are made under a trademark license from NJ TRANSIT.

ATLAS’ ALP-45DP MODEL FAITHFULLY REPRODUCES THE PROTOTYPE WITH THE FOLLOWING FEATURES:

- Designed from prototype drawings and field research with the cooperation of NJ TRANSIT
- Illuminated directional LED headlight/ditchlights and red marker lights
- Pantograph (non-functioning) can be positioned up or down
- Five pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Factory-applied railings, air horn and antenna details
- Grab irons packed separately for customer application (includes drilling template).
- Equipped with Kadee metal couplers

SILVER VERSION INCLUDES:

- HO: 21-pin plug for DCC (decoder ready); N: Next18 decoder ready
- Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder

GOLD VERSION INCLUDES:

- (DCC Operation Features)
- Sound-equipped
 - Supports all DCC-programming modes
 - Flexible mapping of function keys F0 to F28.
 - A total of six DCC function outputs are available
 - Follows all NMRA DCC standards and recommended practices.

ANALOG (DC) OPERATION FEATURES:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts.
- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series locomotive can be controlled by an easy-to-use basic DCC system.
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

SOUND FUNCTIONALITY FEATURES:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes “on the fly” are provided for true realism.

ATLAS MASTER® HO & N ALP-45DP LOCOMOTIVES - EXO (Patch)

ALP-45DP Locomotive - Exo (Patch)

ATLAS' ALP-45DP MODEL FAITHFULLY REPRODUCES THE PROTOTYPE WITH THE FOLLOWING FEATURES:

- Illuminated directional LED headlight/ditchlights and red marker lights
- Pantograph (non-functioning) can be positioned up or down
- Five pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Factory-applied railings, air horn and antenna details
- Grab irons packed separately for customer application (includes drilling template).
- Equipped with Kadee metal couplers

SILVER VERSION INCLUDES:

- HO: 21-pin plug for DCC (decoder ready); N: Next18 decoder ready
- Atlas Silver Sound Ready models are equipped with a speaker for easy conversion to sound with the addition of a decoder

GOLD VERSION INCLUDES:

(DCC Operation Features)

- Sound-equipped
- Supports all DCC-programming modes
- Flexible mapping of function keys F0 to F28.
- A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

ANALOG (DC) OPERATION FEATURES:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts.
- Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the Atlas Gold Series U33/36B locomotive can be controlled by an easy-to-use basic DCC system.
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive (such as the Atlas Gold Series U33/36B) CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

SOUND FUNCTIONALITY FEATURES:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more.
- There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

Atlas Track Planning Software

Atlas is proud to offer Atlas Track Planning Software to help you design your dream layout. This software allows you to create & customize a layout, view it as a 3D model and then generate a shopping list to make your dream layout a reality.

Note - this software works on Windows OS only.

Features:

- Select pieces from Atlas' 9 track lines and build your dream layout with ease
- Model flex-track routes in an easy, intuitive and realistic way
- Arrange your layout on multiple levels with different heights and grades
- Easily draw figures to create train stations, houses, industries, roads & infrastructure
- Use the 3D tool to bring your layout to life
- Measure distances and track section lengths
- Export, Print or Share your layout with your friends
- View and print a list of the Atlas track pieces you need to begin building your layout
- Layout libraries will be available with future library updates

Atlas Track Planning Software 3-D viewer

Your Commuter Train?

ried and true layout track plans in N & HO scale.
accessories to build the layout of your choice.

No Matter the Scale, No Matter the Space - Atlas Has the Layout For You!

N CODE 80: N-7 TWICE AROUND VIA "UP & OVER"

From Book #6: *Introduction to N Scale Model Railroading*

Minimum Table Size Required: 32" x 45"

Products Required: Straight sections, radius sections, turnouts, a crossing, bumpers, insulated joiners and terminal joiners, necessary electrical components

If you enjoy watching a long train work its way up and down the grades of a long winding main line, the N7 is the layout for you. On this layout, yard tracks are available for breaking up and storing long trains, and a passing track with two industry spurs is available to provide additional operating diversions.

N SCALE CODE 55: N-504 PLATTSBURG PRETZEL

From web site: www.atlasrr.com **Minimum Table Size Required:** 2' x 5'

Products Required: Straight & radius sections, turnouts, a crossing, terminal joiners, bumper and a selector

Take an ordinary oval track, twist one end and you have one of the most popular track plan elements: the Figure 8. The Plattsburg Pretzel is a Figure 8, keeping operation interesting by making the train appear to reverse its direction as it proceeds. This layout also adds interest by adding a spur for more train enjoyment.

HO CODE 83/100: HO-7 THE JUNIOR PRETZEL

From Book #9: *Beginner's Guide to HO Model Railroading*

Minimum Table Size Required: 6' x 8'

Products Required: Straight sections, radius sections, Snap-Switches, rerailers, terminal sections, a crossing, bumpers, rail joiners and the necessary electrical components

Since it is built on an extended platform, there are many possibilities with the HO-7; such as longer runs, longer trains and more realistic operations.

TT-3 MARTIN'S CREEK & SOUTHERN

From Book #15: *Blueprints for 10 True-Track® Layouts*

Minimum Table Size Required: 4' x 8'

Products Required: Straight sections, radius sections, Snap-Switches, bumpers, insulated joiners and terminal joiners, a Selector, necessary electrical components

The Martin's Creek & Southern adds a passing siding and a dogleg to the basic oval, increasing interest and slightly lengthening the main line run. The spurs on the inside of the oval, along with the one in the dogleg, add switching locations.
